## HUBCAPS AND MARRIAGE

--Harry Golden

In mid-twentieth century America there's a problem about automobile hubcaps. I know some folks here in Charlotte (N. C.) who remove their hubcaps Friday afternoon when they get home from work for the week-end. they are tired of having them stolen. Teen-agers steal these hubcaps and probably trade them for a few cents some place, or they do it for a thrill.

There's only one cure for this problem: Marriage. We have found that when the teen-ager marries he stops stealing hubcaps. The psychologists who advise against early marriages have not taken this into consideration. Even if he marries at the age of 16 it ends his career as hubcap stealer. There's something about marriage that gives a man a greater sense of responsibility.
