Unique Program Given By Astrotekton Society

The meetings of the Astrotekton Literary Society have been unusually interesting lately, due to the very attractive programs that have been arranged. Not only have they furnished amusement for the society's members, but also they have revealed much unsuspected talent within the society.

At the last Astro meeting the society received the unexpected privilege of hearing Mr. Steele of Southampton, Mass., a musician of note, play a series of popular songs. After this, the novelty group, of which Miss Evelyn McCall is chairman, presented a rather humorous interpretation of a program arranged by the fifth grade of the Crooked Creek Consolidated School for the meeting of their

French Lecture Given By Monsieur Bouteron

On Thursday night, March 27, at 8 o'clock, the "Circle Française" of Meredith sponsored a lecture by Monsieur Marcel Bouteron, a native Frenchman, in the college auditorium. A large interested audience, consisting of the French students and friends from Raleigh and Duke University, awaited the speaker, and listened attentively all during the evening. The subject was "Une Annie de la vie de Balzac," and the lecture was delivered in French, and illustrated by slides.

Marguerite Mason, president of the French Club, gave a few words of welcome in French, and introduced the speaker.

Monsieur Bouteron said that he was going to speak for a while about Honoré de Balzac, the man, although he was a great writer and novelist also. The year of his life which he used was 1835. The year before, Balzac had met Madame Hanska, a Russian countess, whom he was to court for 18 years and finally to marry.

The speaker told of the exciting time when Balzac had to disguise as a woman, take a fictitious name, Madame Vieve Durand, in order to escape the national guard. Later on Balzac

MANY VISITORS ATTEND FAIR AT STATE COLLEGE

Annual Celebration of State Engineers Attracts Large Crowd

The fourth annual celebration of North Carolina State College School of Engineering, which lasted for three days, came to a close on Saturday night with the "Grand Brawl," brilliant carnival dance at the Frank Thompson Gymnasium. This event included many notable attractions, but the one which attracted most attention was the Fair, which was scheduled on Friday from 2 until 9 o'clock.

Every department of the School of Engineering was open for inspection, and visitors were ushered through the shops and laboratories under the direction of student guides, who explained the various engineering processes.

One of the outstanding exhibits was the State College War Memorial model, which is a complete work by J. D. McCall, of Florence, S. C. The model contains seven chimes and is one-tenth the size the tower will be when completed. This exhibit won first prize in the engineers' parade Thursday night.

The architectural exhibits are claimed to be the largest ever held in the South. The Beaux Arts Institute of Design recognized 20 of the students' designs last year, and the recognition from this institute is the zenith in the work of an undergraduate in architecture.

The Ceramic Engineering Department presented an unusually complete and elaborate display of pottery and ceramic products of the students. Harvey C. Tucker, of Fair Bluff, took first place among the indi-
