Students Must Cooperate with Government

Checking Policy Is Challenged: Students Take Advantages

Our somewhat ideal policy of not checking this year has been challenged almost continuously Of course, if it were not, it would not be worth much anyway. There are those who say that a good many students think they can get away with murder, so to speak, simply because they know no one is watching their every move or trying to "catch up' with them. There are those who do take advantage of just that, but whether there are more than those who have taken advantage of other systems is questionable,

Will you be honest with your self and see if you are slipping where you are pretty sure no one is likely to know the difference? How far does your sense of honor go? Does it work only if it is convenient and is it cast aside when it interferes with your personal wishes?

Insofar as each one does not assume personal responsibility for herself and others, any system is ineffective. This year's approach to student government means great deal to some of us, and, I believe, to most of us. Does it mean enough to you to exert more conscious effort to make it a success? Would you rather live here feeling you can be trusted to do what you are supposed to do because you want to do the right thing, or would you rather have someone see that you are doing the right thing, insofar as that is possible? It is up to you to choose which you prefer. Are you willing to admit that so many people cannot be expected to do the right thing, that such other American republics. a system is not practical, but only a foolish ideal?

Comparing our approach with other systems, I am quite sure that, with all its flaws, it is the better way--it is the basis of true and genuine growth and it is more valuable. It cannot be accomplished in six months, or a year, or perhaps even two. Is it worth the effort and the continued striving necessary to make it a reality? I believe it is, but the neergy, the application of enough people to keep it alive and growing. Ideally, it would take every last one of us. Is it going forward on the shoulders of a few people, of everyone but you, or will some of the weight be yours also? If you shift your share to the shoulders of someone else, and if enough people do that, in the process, to say nothing of someone will get weightd down the damage which will result to the system.

Faith and other intangible values, which accompany anything possessing the ideal is worth something-it is worth far more than lack of faith and understand, even when that faith is betrayed. It is the same principle as believing love is a more powerful thing than force. That may seem a foolish assertion in our world to day, but what would happen if no one still believed that, if no one continued to cherish that ideal! The reason love seems inadequate is that so few people have tried it, hav really believed init. The same is true of a real honor system. So few people have really believed in it enough to try it. Love is the better way, and just so, I believe trust practically applied is the better way for student government. It can

Opportunity for Discussion

Sometime in the near future a group of Meredith students, including International Relations Club members and all others who wish to take part, will meet for a discussion on inter-American affairs and problems, as part of a nation-wide Extempore-Discussion Contest in which six awards of tours to other American republics are planned. Such topics as "Defense of the Americas." "Inter-American Trade," and "Travel between the Americas" are to be taken up and discussed.

The contest is sponsored by the office of the coordinator of Inter-American Affairs, through the National Public Discussions Committee, Inc. It has received the endorsement of President Roosevelt. Participation on our campus is being arranged by Miss Study Data Frances Bailey, head of the Speech Department.

Of the twenty one senior colleges participating in North Carolina, five students from cach school who demonstrate greatest mastery of the subject and superior ability in expressing their ideas will represent the school at a district conference of eight to ten schools in this vicinity. Round tables and an extempore discussion forum are to be held, and other American republics in the many district meets also plan a special Pan American program and radio broadcasts at the same time. Forty-seven district contests in all will be held.

The two outstanding students at each district conference will be sent to one of the six regional meetings, the winning student from each region becoming a delegate to the National Intercollegiate Conference on Inter-American affairs in Washington. According to plans all six winners will be awarded a tour of the

About 400 colleges and universities are taking part in the contest, according to Dr. Alan Nichols, director of the National Committee in New York. The cagerness of the schools to take part shows that students in our country are deeply interested in improv ing Pan American relations.

OCIAA Gives

The Office of the Coordinator of Inter-American Affairs, through the National Public Discussions Committee, Inc., is sponsoring a nation-wide discussion of inter-American affairs, in which this school has agreed to participate. Delegates to the national conference for the contest will be rewarded, it is planned, with a specially conducted tour of the summer of 1942.

The discussion program calls for intensive study of inter-American problems and is open to all students, through departments of public speaking, Spanish, international relations, social studies and related fields. Among topics suggested for extempore-discussion forums are "The Importance of Hemispheric Solidarity in Defense," "Inter-American Trade at the Crossroads," "Ships for Inter-American Trade," "Rediscovery of the Americas by Americans, "How Modern Transportation and Communications Helped Unify the Americas," and "The Danger

Threatening the Americas." Not later than March 1 each school will select five to eight students who have demonstrated the superior ability in the public expression of their ideas. The winners will represent their schools at one of about fifty district conferences to be held throughout the Zebulon.

From each such conference the two outstanding students will be selected as representatives for seven regional metings. One student from each regional meet will become a delegate to the National Intercollegiate Conference on Inter-American Affairs and according to present plans will be rewarded a tour of the other American republics this summer.

The contest is being conducted under the management of the National Public Discussions Committee, Inc., of which Dr. Alan Nichols is director. Dr. Nichols, a native of lowa, has for twenty years been director of inter-collegiate forensics at the University of Southern California.

Members of the Advisory Committee of the contest are:

News Bureau Makes Request of Students

To the students and faculty:

Meredith has been kept "in the news" fairly well this year, which may be attributed to the splendid cooperation which has been received from students and faculty. It is not possible for us to cover every event, and for that reason reporters of campus organizations working in connection with the News Bureau makes the news coverage more complete. Everything that is turned in to the papers is not printed, but ev-Meredith is that much better ples in public places.
