GOT A BIG CROWD coming for supper? Try this new recipe: Calls for one elephant, brown gravy, two rabbits (optional). ...Cut elephant into bite-sized cubes. This takes about two months. Add enough brown gravy to cover. Cover, cook over kerosene fire for about four weeks at 465 degrees. Yields 3300 portions --- if more guests are expected, add rabbits --- only if necessary, though --- most people don't like hare in their stew.
