

PINE KNOLL SHORELINE

Issue No. 56

June, 1978

Final Edition

Editors: Mary Doll  
Betty Hammon  
Noni and George Eastland

To The Editors of the Shoreline:

So this is the final issue!

It is hard to believe that we will no longer be reading of Town activities, of newcomers, of friends and neighbors, of new and interesting places in the County, of all the many facets of life in PKS that we have been privileged to read about in "our" paper.

No doubt its publication meant hours of work by all who contributed their time and talent and it is understandable that their efforts must finally end. But we will all miss the Shoreline and remember it affectionately.

I want to express my appreciation and that of our Town to the Shoreline editors, writers, reporters, typists, assemblers, proof-readers and all who contributed to its success.

It may be that some day a new Shoreline will rise, Phoenix-like, to carry on the traditions established by the old.

Many thanks.

Ken Haller  
Mayor-Pine Knoll Shores

WELCOME, Bob and Marion Greenlaw. Bob and Marion built on Oakleaf Dr. way back when there were very few of us here. They have been coming down from their New York City apartment when they had time off from Bob's work, which involved so much overseas travel in pharmaceutical sales. Now that Bob has retired they plan to divide their time between Pine Knoll Shores and their home in Main. Both of them are golfers and familiar figures in the community, so this is not an introduction, but a welcome to say how glad we are they can now spend so much more time in PKS.

WANT your lawn mowed this Summer? Dutch Sensenich, Knollwood Drive, is interested in mowing lawns in PKS. He prefers to use your mower. He charges by the job, and you can call him at 726-4580 after school hours.

A MOVIE ACTOR in our midst? That's right. Ed Spader had a rold in a movie films in Hamburg when he was in Germany this year. Friends suggested that he go down to the studio, which needed some extras, and he was promptly hired for the role of an electrician in a crime movie being made in Germany by an Italian producer about a safe-cracking job in New York. Ed, as an electrician, had to deactivate the alarm system on the safe and windows of the building. He had to learn how to look scared, how to sweat (glycerine drops) from fear, and how to get shot. He had a contract for a minimum of four days and worked seven. Glamor? Well, he says, you sit for two hours waiting for the lights to be set, work an hour, and wait another two. But he had fun, and promises to tell us when the film is released in this country.

KEN AND IRENE DOREMUS will have begun blood pressure clinics at the Town Hall by the time this letter reaches you. You can have your BP checked on the second and fourth Wednesdays at the Town Hall (June 14th and 28th, for example). EMT's will be on duty from 9 to 12 on these mornings.
