VOLUME VIII - Number 2

February 1987

Mary Korff, Editor

Prior to their regular meeting on February 10th, the Commissioners met in a work session to consider what action to take on the flood control problem which Commissioner Shedd and his committee has been considering for over a year. Col. Paul Dennison, representing Van Oessen Associates, presented his recommendation which is essentially the recommendation made at the public hearing last year. Much work has been done since that time. The Committee has come up with several ideas and suggestions. CAMA and the Environmental Management Division of the N. C. Dept. of Natural Resources and Community Development have not approved the plan which ultimately calls for drainage into the canal in the event of a two-year storm. Several other alternatives have had to be ruled out for one reason or another. Col. Dennison recommended that the town request the EMD to consider two alternatives. One would be to grant a variance, allowing this to be done because of the specific problem here in Pine Knoll Shores; or [2] that the canal be reclassified from SA to SB thereby allowing such a runoff under these exceptional circumstances. At the meeting following this work session it was agreed that Mayor Hanan would make this request.

COMMISSIONERS

MEET

The first order of business at the regular meeting was the opening of sealed bids for fire apparatus. Commissioner White opened two envelopes but only one of them contained a bid. The second company believed their bid would not be competitive and declined the opportunity to make one. Commissioner White said that they would have to advertise again.

Two of the Commissioners made an appeal to residents. Commissioner Shedd asked that residents be reminded that trash must not be put out on the right-of-way more than 12 hours before pickup and containers must not remain there longer than 12 hours after pickup. These regulations have been printed here in Shore Line before but still some folks persist in disregarding them. It is in the interest of every resident that the town be as attractive as possible and simple observance of these measures can make a big difference.

Commissioner Sotir said that more EMT's are needed on the Rescue Squad. He asked for volunteers. As soon as enough Volunteers come forth a training program will be set
