ATTENTION

As of September 1, garbage collection will return to return to once a week pickup (MONDAY). Recycling will continue every other Thursday.

AUGUST BOARD OF COMMISSIONERS MEETING

BEACH RENOURISHMENT

At the August 9 Town Board Meeting, Commissioners voted unanimously by resolution to support the Beach Renourishment Committee by asking the United States Department of Army, Wilmington District, Corps of Engineers, to designate the ocean front of Pine Knoll Shores as a priority area to receive any sand that needs a deposit area in the immediate future. Studies by the Department of Environment, Health and Natural Resources studies indicate the current erosion rate is now approaching five feet a year.

Serving on this committee chaired by Dr. Ruth Sweeny are: Russ Beard, Victor Bryant, Paul Gross, Kenneth Hanan, Reese Musgrave and Judy Poit.

MIMOSA BRIDGE BULKHEAD

In accordance with the Century/Von Oesen study recommendation, a bid by Mud Bucket Dredging Co. for \$33,815 has been approved by the Board of Commissioners for the repair of 105 feet of bulkhead near Mimosa Bridge using polyvinylchloride capped with concrete. The estimated life of this vinyl material is 25 years. A small amount of cleanup dredging of approximately 270 cu. yards of sand will take place and be used to back fill the new seawall at an additional cost of \$3,510.

PINE KNOLL CONDOMINIUMS

At the recommendation of the Planning Board, the Board of Commissioners voted to approve the site plan of the proposed Pine Knoll Condominiums, to be located on 1.98 acres of oceanfront property west of Genesis. This approval is conditioned upon the receipt of all federal, state and town permits and arrangements with Genesis to tie on to their waste water disposal system. There will be six units with four parking spaces for each unit with an additional eight for guest parking. The Community Appearance Commission has approved the landscaping plan.
