South Sea Story

A merchant heard that the natives of a South Sea island had more gold than they knew what to do with, so he decided to help them out. He sailed to the island with a shipload of onions, something the natives had never tasted. Delighted, the islanders exchanged a shipload of gold for the shipload of onions. A business rival of the first merchant was enraged when he heard of this deal, and immediately set sail for the island with a cargo of garlic. He was sure that if his rival had been treated so well by the natives because he had brought onions to the island, he would receive even more gold for his contribution of garlic. True enough, the natives were overjoyed with the garlic. When the merchant asked for gold in return, they would think of giving him nothing so common. They turned over their prize possession to him—a shipload of onions.

A man should be careful never to tell tales of himself to his own disadvantage; people may be amused and laugh at the time, but they will be remembered and brought up against him upon subsequent occasion.—Johnson.

Stop That Cold!

Cover your cough, do the same with your sneeze.
 Don't pass on the cold that is making you wheeze.
 Get plenty of rest, from your friends keep away,
 They don't speak of colds when they say "Let us s-pray."

The Pleasant Word

It is the pleasant worker who succeeds. No one can do his best in the midst of nagging, argument and worry. Therefore, work as cheerily as you can, and do not put even a straw in the way of others. There are always plenty of rocks and pebbles and holes along each one's path, but the pleasant word always makes the going easier.

A colonel passing near the stables noticed several privates, each of whom was holding a lump of sugar. Making mental note of the fact that these men must have a great love of animals, he said, "I suppose you will give the sugar to the pet of the regiment."

"Not on your life," replied one recruit. "The sugar goes to the one that kicked the sergeant."

The torment of uncertainty is very great; and as soon as the wavering mind begins to determine, be the determination which way soever, it will find itself at ease.—South.
