## MILL WHISTLE

Fieldcrest Mills General Sales Meeting Is Held In New York

Shown above is a scene at the luncheon held during the general sales meeting Friday, December 19, at the Plaza Hotel, Fifth Avenue at Fifty-ninth Street, New York City. Salesmen representing Fieldcrest Mills, our selling agents, mill executives, and officers of Marshall Field & Company attended

the all-day session. Speakers included Hughston M. McBain, president of the Company; G. L. Bergen, divisional vice-president; Luther H. Hodges, general manager; Harold W. Whitcomb, assistant general manager, and several outside speakers from the merchandising and economic fields. The

Fieldcrest Quartet from the Draper Mills sang and Cecil J. Squires, foreman of the Sheeting Weave Room, made a talk to the group. Among the Spray officials attending in addition to Messrs. Hodges and Whitcomb were E. L. Brown, B. C. Trotter, M. P. Miller, R. H. Tuttle, and J. M. Norman, Jr.

### Hodges And Whitcomb To Speak On Council Program This Week

The January meeting of the Carolina Cooperative Council will be held in the Peaksville High School auditorium Thursday evening, January 22, at 7:30 o'clock with members of the Junior Council as guests.

Principal speakers on the program will be Luther H. Hodges and Harold W. Whitcomb who will present a review of the accomplishments of the during the past year and a forecast and discussion of the progressive outlined for the business in the year.

### Construction Will Bring Improvements At Rayon Mill

Construction is under way on a new stair tower and elevator shaft at the southern end of the Rayon Mill. It is expected that the work will be completed and the elevator put into operation by March 1.

The new 10' by 12' electric freight elevator will be almost a duplicate of the large one in use at the lower end of the Nantucket building. Howard Barton, superintendent of the Rayon Mill, said the new elevator will make it easier to move heavy loom beams from floor to floor, and if need be would enable the mill to move looms or coping frames without having to knock out an end of the mill and build high

ramps when moving machinery in or out of the mill, as has been necessary in the past.

The stair tower will have one main entrance and will connect with all three floors. The entrance will be on the first floor in line with the center of the mill. This location will relieve the situation existing heretofore when the gate opened directly toward the railroad tracks. The new entrance will have a walkway connecting it with Wall Street some distance below the tracks.

Mr. Barton said the old elevator shaft inside the mill will be closed, thereby
