## ★ SAFETY FILM

(Continued from Page One)

The film was produced by the Communications Center at the University of North Carolina, Chapel Hill, with Edward Freed as director. The movie is sponsored by the Safety Division of the North Carolina Industrial Commission with the cooperation of textile manufacturing companies throughout the state. H. E. Williams, safety director at Fieldcrest Mills, was a member of the advisory group.

The synopsis of the picture tells the story of John Duffy, a good workman, a careful driver, a man with a fine wife and family. The only thing wrong with John is that he takes a short cut every day through a zone marked "Danger." One day when he takes a chance he loses. He is seriously injured.

Mr. Williams announced that the film has been booked for Fieldcrest Mills October 17-24. It will be shown to the Central Safety Committee and to plant safety groups.
