

WASTE CONTROL—Charlie Cannaday, lease man at Towel Mill, prepares for warp change. Note that only a minimum amount of yarn remains on the beam. When warps are properly run out, the last good yarn on the beam can be woven into cloth; when warp is cut off too soon this yarn becomes waste.

Towel Mill Honors Its Quality Leaders

Top quality weavers and top loomfixers at the Towel Mill for the most recent periods of record are shown below.

In addition to being published in The Mill Whistle, the names of the "top" weavers and loomfixers are posted on the weave room bulletin boards each week.

The "Weavers of the Week" are those with the lowest per cent of seconds with respect to the standards for the various loom groups.

The top loomfixers are determined through a combination of low seconds and high loom efficiency on their respective sections.
