Working Together To Prevent Plant Accidents Brings Outstanding Safety Record For Blanket Sewing Dept.

Congratulations are in order to the employees of the Blanket Cutting and Sewing Department at the Finishing Mill who have completed over a million man-hours of work without a lost-time accident.

Actually, the department had operated 1,018,196 man-hours through July 31, and the employees are continuing to add to their accident-free record.

A report by the Fieldcrest Safety Department pointed out that the Blanket Cutting and Sewing Department is the only department at the Finishing Mill which has a million man-hour safety record at this point. However, there are some departments at other Fieldcrest plants which currently have million man-hour records.

In commenting on the fine safety record, Walter Schacht, foreman of the Blanket Cutting and Sewing Department, said: "Credit for this outstanding achievement is due primarily to the efforts of the employees in the department.

"All of them are aware of what safety means to them and of what a disabling injury could cost them in lost wages and suffering.

He pointed out that a number of mill departments at Fieldcrest have attained records of over a million man-hours without lost time due to injury.
