

Top Weavers, Fixers Listed For Towel Mill

Recognition Is Given To Those Operators With Best Records For Quality and Efficiency

Top quality weavers and loomfixers at the Towel Mill for the most recent periods of record are listed below.

As part of the mill's program for giving recognition to the weavers and fixers with high quality and efficiency, names of the leading operators are posted on the mill bulletin board each week and are published in The Mill Whistle.

The "top" weavers are those with the lowest percentage of seconds with respect to the standards for the various loom groups.

The leading loomfixers are determined through a combination of low seconds and high loom efficiency on the sections for which they are responsible.

Quality Weavers

William Adkins is a newcomer on the Blanket Mill's quality honor list for the six months ending December 31. The complete list follows below.

The listing of the quality weavers is part of a program at the Blanket Mill designed to emphasize the importance of quality weaving and to give recognition for outstanding records.

In order to make the quality honor list a weaver must work for six months without a major quality defect in his or her cloth.

When a weaver on the list has a major quality defect, his name is dropped. Other weavers are added as they attain six months of quality work.
