

Company Acquires Muscogee Mfg. Co.

(Continued from Page One)

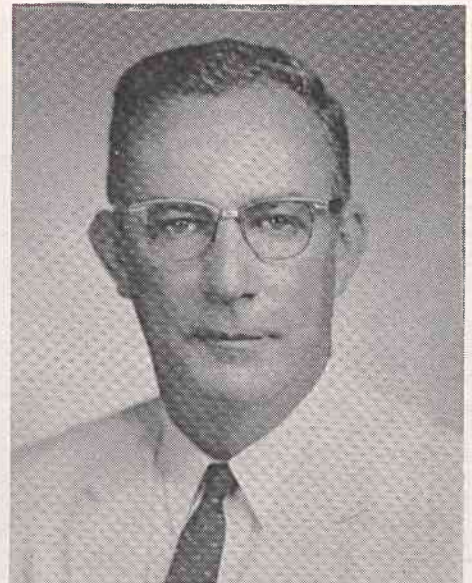

is Phenix City, Ala., a city of 30,000 population. Many of the employees of the Muscogee plant make their homes there.

Phenix City is the gateway to East Alabama in the hub of the Chattahoochee Valley. There, also, construction is under way on a river port that will ultimately become a transfer point for shipping to such nearby points as Birmingham and Atlanta.

Major commercial construction, many miles of new residential paving, a multi-million dollar sewer system and a new city administration building reflect the progress and achievements that justify Phenix City's claim as one of Alabama's most progressive cities.

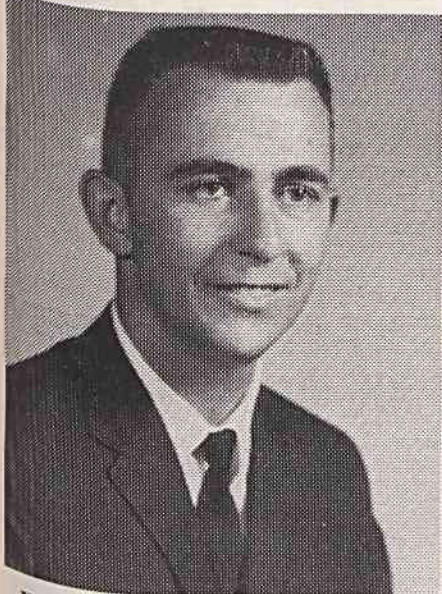

JOHN P. POWELL

HUGH T. BUNDY
... Manager For Blankets ...

New Asst. Foreman

William H. Daughtry was promoted to assistant foreman of the Control Assembly Department at the Automatic Blanket Plant at Smithfield. He assumed his new duties July 8.

Mr. Daughtry has worked at the Automatic Blanket Plant since August, 1960, and had worked as a sealer operator in the Molding Department and as a mechanic in the Plant Service Department before his promotion to assistant foreman.

He is a graduate of Princeton High School, is married and has two children. His wife, Peggy, is employed in the Blanket Wiring Department at the Automatic Blanket Plant.

Government Debt

In fiscal 1963, according to Tax Foundation's publication, Facts and Figures on Government Finance, 1962-63, Uncle Sam will pay an estimated \$9.7 billion in interest on the Federal debt. This sum, to be paid in one fiscal year, is slightly more than all the money lost (\$9.6 billion) on price support programs from 1933 to 1961.

A. L. Jackson Named Muscogee Manager

(Continued from Page One)

the Blanket Mill in Draper and the Finishing Mill in Spray. He served as assistant to the vice president-manufacturing before his appointment as manager of blanket and sheet operations.

Other organization changes, connected with Mr. Jackson's transfer to Columbus, were announced as follows:

Hugh T. Bundy, assistant manager of the Blanket and Sheeting Mills, was appointed manager of blanket operations with responsibility for the greige mill, finishing and shipping. Reporting to Mr. Bundy will be C. A. Davis, superintendent of the Blanket Mill; and Frank T. Suttentfield, general superintendent of the Bleachery, Finishing Mill and Central Warehouse.

In addition, Norman F. Young, superintendent of the Bleachery and Sheet Finishing Mill, was appointed assistant to the manager of blanket operations and will retain his responsibility for commission finishing.

John P. Powell, manager of the Bleachery and Finishing Mills, was appointed manager of sheet operations, including greige, finishing and shipping operations. Reporting to him will be R. C. Going, superintendent of the Sheeting Mill; J. Scott Chowning, general foreman of the Sheet Finishing Mill; and Carson Slaughter, office manager for sheet warehousing and shipping operations.

It was also announced that Richard H. Tuttle who, as director of technical services, has responsibility for several staff departments, will be given special assignments as assistant to the vice president-manufacturing in addition to his present responsibilities.

R. H. Tuttle

Mr. Bundy has been with Fieldcrest since 1937 and has served as assistant manager of the Finishing Mill, head of the Cost Department, assistant manager of the Sheeting Mill and, since 1954, as assistant manager of the Blanket and Sheeting Mills.

Mr. Powell, who also joined the company in 1937 and at one time was head of the Cost Department, has served as assistant to the production manager, and as assistant manager of blanket and sheet operations, both greige and finishing. He has been manager of the Bleachery and Finishing Mills since 1949.

Joined Company In 1929

Mr. Tuttle joined the company as a dyehouse foreman in 1929 and has since served in a number of technical and managerial positions. He was superintendent of the Karastan Rug Mill for several years prior to becoming director of industrial and public relations. He later was the manager of a lace curtain mill owned by Marshall Field & Company at Zion, Illinois.

He became director of research and quality control in 1947 and later was given the additional responsibility of engineering and supply purchasing. Since 1956 he has been director of technical services, including the Research and Quality Control, Domestic Product Development and Mechanical Development Departments.

Mr. Young first joined Fieldcrest in 1953 as a chemical engineer in the Research and Quality Control Department. He served as foreman of the Bleachery, as assistant superintendent and most recently as superintendent of the Bleachery and Sheet Finishing Mill.

N. F. Young
