Credit Union?

Just what is a credit union? Is it a credit bureau? A small loan company?

No, a credit union is first a common bond of association among people such as yourself and the other employees of Fieldcrest Mills, Inc. Secondly, it teaches you the wise use of "credit."

In addition to loaning money to members at low rates of interest, credit unions also provide a convenient and safe place at which to save. Moreover, they teach the habits of thrift, or the wise management of one's total resources.
