

New Fieldcrest plant being built at Greenville will contain complete equipment for manufacturing yarn on worsted system.

## Construction Nearly Complete On New Plant

Construction is nearing completion on the new plant being built at Greenville to provide additional spinning capacity for the Karastan rug manufacturing operation.

Containing 50,000 square feet and costing approximately \$1½ million, the new facility is being built on a 60-acre tract owned by Fieldcrest Mills in the

Industrial Development Park located on Highways 11 and 13 north of Greenville.

The modern, air-conditioned building will contain complete equipment for manufacturing yarn on the worsted system. It will provide the Company with its own source for worsted yarn which heretofore has been purchased

from outside suppliers.

It is planned to start moving machinery into the building during this week and the plant is scheduled to be in operation during June. When completed, it is expected that the new facilities will furnish employment for approximately 70 additional people from the Greenville area.

## Employee Is Presented 'Gold Shoe' Award

Willie G. Mills, a tie-in operator, whose foot was saved from injury because he was wearing safety shoes, is presented "Golden Shoe" award by Robert L. Hamilton, foreman of Weave Room at Draper Sheeting Mill.

Willie G. Mills, employed in the Weave Room at the Draper Sheeting Mill, was recently awarded a certificate designating him a member of the "Golden Shoe Club."

To become a member of this club an employee must have been saved from a foot injury by the wearing of safety

shoes. Mr. Mills' safety shoes stood him in good stead when the button operating a hoist for handling warp beams stuck and the hoist and cross member, weighing approximately 600 pounds, fell on his toes.

Kenneth R. Baggett, safety director, said that many cases in which injury is

Mr. Mills shows the hoist and cross member which recently fell on his toes which were protected by safety shoes.

prevented by safety shoes go unreported. Any time a foot injury is prevented by the use of these shoes the person involved should tell his supervisor.

The supervisor will then be able to inform the Safety Department of those who are eligible for membership in the "Golden Shoe Club."
