New Facility Has Capacity For Greater Volume In West

The newly-built Fieldcrest Service Center in Los Angeles was occupied recently and is in full operation. This Service Center covers a large portion of the Company's Fieldcrest and St. Marys branded business in 11 western states and Hawaii.

The overall building contains 150,000 square feet, of which Fieldcrest Mills is using 75,000 and sub-leasing the other 75,000. The latter area will be available to the Company as the Service Center volume in the Western region expands.

Pictures on these pages show representative views of the new facilities and some of the Fieldcrest employees at this location.
