

# and Carpets For Spring, 1971, Season

"Intentional Dimensional" is the name given to this eye-catching geometric design in new collection. These rugs were created to stand alone as focal point in room.

"Mosaique" is another large-scale geometric design in American Originals. Glass-topped dining table provides unrestricted viewing of made-to-be-seen bold patterns.

"Spectacular" is what Karastan calls this new textured plush carpet. Unusual resilience and luxury is made possible by new bulking process introduced by Karastan.

"Professionale" is one of two new contract grades being added, designed with colors and patterns to appeal to home-makers as well as for use in commercial buildings.
