"Waste buggies" are clearly identified for par-
 nner against wall at one side of room. Other
 Room is generally neat and orderly.

plant manager, said: "Our system is based on regular cleaning on specific schedules so that lint and dust are not allowed to accumulate. We also believe in the saying, 'a place for everything and everything in its place'. This makes for a safe and orderly workplace and helps us to use our space to the best advantage.

"Good mill housekeeping is important for other reasons, too. It helps morale because everybody had rather work in a clean, orderly place. It also aids quality and safety. We believe that good mill housekeeping and safety are related, since neatness and orderliness help to prevent accidents."

In picture made in the Carding Department, notice that cans of card sliver are stored in orderly manner inside the zone lines. Aisle is clean and unobstructed.
