

Tax Filing Time Will Soon Be Here Again

The income tax filing season will soon be upon us. So it's a good time to start getting your tax records together for use when needed.

Cancelled checks, receipts, records of contributions and other financial data will help you to file more accurate income tax returns.

25-Year Club Meeting

age over and above the basic plan. The revised Major Medical meets that need.

At the time of the changes in July, the Major Medical insurance and the existing group insurance plan, including the Base Hospital Plan, were combined into one insurance "package".

How Major Medical Works

Here is how the Major Medical works: After the base plan has paid all it will pay, the plan member pays the next \$100 and then Major Medical pays 80% of all covered charges connected with the hospitalization up to a maximum of \$25,000.

Benefits under Major Medical continue for six months after the date that you are released from the hospital. Although you must be hospitalized to start a claim, Major Medical coverage applies to the related costs of drugs, doctors' visits, registered nurses' care or other covered charges for six months

after the date of your discharge from the hospital.

If you are reconfined to the hospital for the same cause after the six months period, the insurance benefits will begin anew with an additional deductible but also with another six months of coverage from the date of your next release from the hospital.

The new insurance certificates are being sent to all plan members who were on the active payroll November 3. Those who have been out and have returned to work since that date should request a certificate from the area personnel manager.

New employees hired after November 3 will automatically receive their certificates through the mill mail system.

If an employee has any question about his insurance coverage at Fieldcrest he should talk to his local personnel manager or contact the Insurance Department at the General Offices, Eden.
