

# The Gossip by Snookie

Snookie was gratified at the response the "dirt box" received. Here are some bits of gossip.

A "sweet innocent" on hall six, Alba, went deer hunting and caught a lion - another girl on second Fellowship made a hit with her "freckles" recently.

Ah - "Muggsie" is said to have received a key to a M. H. heart; also it looked like a "love-match" at ping-pong last weekend. From another college, Davidson, has come news that a little junior college Waynesville girl goes to the Hop.

Christmas brings Mae and Sunny, but one Sunday left Mae and Dot waiting.

Seems that Barbee is linked with Rutgers, and Clyatt fans at N. C. State are numerous.

A Stewart likes Jeepers Creepers while a Bowles collects locks of hair - what!

We wonder if that Paslay girl will be able to speak French when he gets his vacation and sails over.

First it is a book of poems, phone calls and now Evening in Paris for the Swift girl from "Little \_\_\_\_\_ Play on Yo' Harp."

Fallen toes and nots on feet.

--Joy Juniper

## BIOLOGY

Since studying Biology I have become much more interesting.

--Sallye Walker Sturgeon

Explain "Man changes every seven years".

At the age of seven he changes from infantry to childhood; at the age of fourteen he changes from childhood to young manhood. At the age of twenty-one he is a Man.

--Mary Maner

To live is to work. Secession is death.

--Hazel McIntosh

Germ cells are those cells which distribute germs.

--Sallye Walker Sturgeon

Biology is an in-houstable subject.

--Ellen Whitehead

Nitrogen-fixing bacteria are found between nitrogen and nitrates in the nitrogen cycle on page \_\_\_\_\_ of the Biology textbook.

--Sallye Walker Sturgeon
