

BUSINESS EDUCATION

NOTES

NEWS

"During the last week of November, B. A. Kramer's books, were completed and submitted to be audited by Mrs. Vera Spears."

The Accounting students have completed their first Practice Set. Four weeks ago the sets were begun, and the girls found the sets required as much work and attention as an actual set of books. They found, however, the work engrossing and interesting, excepting those times when ink just would blot, and figures would transpose themselves.

Speed! Speed! Speed! From the time you enter the class until you leave.

You wish you might write a line or so, but first is the process of rules and woe. Do we remember the "forbidden" pencil? You finally reach assignment 21, and oh, what a climb!

Did we feel puzzled when the teacher said, "You will now take dictation." Girls, have we been making hieroglyphics since then?" No--never!

At the present there is a great challenge for the useful people in business Education. Now more than ever before the field is open to young women who are able to meet the requirements of this challenge. It is up to the young women in the Business Education field to make good of this opportunity which is now theirs. This challenge is yours, members of the Business Education field; will you accept it?

Heard in the dormitory almost every night: "Just think, if I had a big fat slice of ham, I'd have a ham sandwich, if I only had two slices of bread."

Mandy and Rastus

A mighty fine girl is Mandy Broom,  
The best wash lady for miles around.  
She never has a chance to shirk,

For Rastus finds her lots of work,

Mandy says: "Me and Rastus is just opposites." (Turn it upside down and see.)
