Budgeting Calories - Jane Rogers

Thrifty Housewife Knows Trick of Balancing the Diet to Obtain Maximum of Food Calories

THE housewife of today is much I more likely to budget her expenses than the bride of fifty years ago. In those days it was only necessary to step into the garden and pluck a generous help-ing of fresh vegetables for the evening meal or stop by the smoke-house and procure a size-

able ham at a minimum of cost.
Today, the problem centers
around making so many dollars
purchase so many calories of food, so many articles of clothing and on through the whole line of

living expenses. Selection of foods is one of the most important considerations in budget making. Each member of the family needs a certain number pound will furnish no less han

of calories per day—varying according to the amount of manual Because of the great number of work or labor indulged in and unless the housewife knows a little about the caloric value of foods there is great danger that her meals will be lacking in some of the most important elements which make up the well balanced diet.

Because of the great number of calories it contains, sugar is one of the cheapest of all foods in addition to being one of the most valuable. It furnishes fuel which keeps the body engine burning, supplies much needed energy and its importance as a sweetener and favorer approach. diet.

With a market list showing prices and a calorle list, the housewife can work out a very nized. "A dash of sugar and a

omical buying. A pound of butter contains 3600 calories and at the average price of fifty cents a pound it is possible to obtain 72 calories for one cent. A pound of bacon at fifty-five cents will furnish 51 calories for each cent; roast beef at thirty-five cents will furnish 27; macaroni at fifteen cents will give 110 while sugar at an average price of six cents.

FOR SAFER DRIVING

Wanted-an automatic candy dis-

penser for the motor car dashboard We have cars equipped with radios, cigarette lighters, flower vases, ash trays, vanities and what-not, but so far no accessory has been provided whereby the man behind the wheel may regale himself with a sweet while he drives-unless a ront seat partner who from time to time plops a bonbon into the the driver's mouth may be so conidered.

The demand for the dashboard andy dispenser follows the discovery by the scientists at Colgate University that frequent doses of sugar increase the motorist's skill and enluranie. Accidents, they say, freuently result from depleted enerby, especially toward the end of a

Acting upon the advice of the Colgate professors, several automobile lub bulletins have stressed the importance of stocking up on carboydrates at the start of a long moor journey. Since candy furnishes carbohydrates in the most convenient and delectable form, a sweets lispenser for the dashboard is cleary indicated.

It's a million dollar idea— and we give it away gratis.

A VALUABLE TREE

St. Petersburg, Fla., July 8 .-- A tree which has a godfather, a bank account and a given name of its own s growing in a public park here.

Myrica Cerifera Davey, the tree, is under the care of a trust fund of 3100, deposited in a local bank, and has a passbook in her name for computation of interest and entry of additional deposits. Her godfather is James A. G. Davey, vice president of the Davey Tree Expert Co., of Kent, O., who established the trust

The tree should live several hundred years. At the age of 200 it will be worth \$732,852.21 if no withdrawals from the trust fund have been needed. This represents accunulation at 4 per cent interest compounded semi-annually.

\$100.00 Monthly For Less Than Cent a Day

Des Moines, Iowa.-\$100 monthly income and \$1,000 to \$2,000 at death in paid under a Real Accident Policy costing less than a cent a day, issued by National Benefit Accident Association, Box 2005 Royal Union Bldg., Des Moines, Iowa.

FAVORITE RECIPES OF A FAMOUS CHEF

As Told to Anne Baker By ROGER CRETAUX, Chef, The Roosevelt, New York City

Savory Brussels Sprouts-Cook one quart of Brussels sprouts in salted water until tender. Drain thoroughly, place in a hot dish and pour over them

a sauce which is made as follows. Mix together one teaspoon mustard, three - fourths teaspoon salt, one teaspoon sugar, onespoon paprika, one well - beaten egg, one-

gar and two tablespoons salad oil. Cook in a double boiler until the mixture thickens. Then add one tablespoon melted butter, one-half teaspoon curry powder, one teaspoon minced parsley, and one-half teaspoon grated onion. Beat thoroughly and pour over the sprouts while both the sprouts and the sauce are still hot.

Tomato Rarebit-Heat one pint of canned tomatoes and add one teaspoon salt, one teaspoon sugar. one tablespoon chopped onion, oneeighth teaspoon pepper, and a dash of cayenne. Keep the tomatoes bubbling over the fire, adding grad-ually one-half pound of cheese cut small pieces. Stir constantly until the cheese has melted and the mixture is smooth. Then add one teaspoon butter and one wellbeaten egg, stirring all the while. Remove from the fire and serve immediately on slices of hot, but-

Finest Lilies

SCIENTIFIC methods of raising water lilies are producing finer plants in the United States than can be found anywhere else in

A few years back, no one considered pond lilies of sufficient importance to spend any time on but that enterprising Polish wom-Helena Rubinstein, discovered that water lily juice has a curious and beneficial effect on

Experiments proved that the juice must be fresh and as wate. lilies are seasonal, it seemed impossible to make any commercial use of her discovery. However, the United States is blessed with a variety of temperatures and by purchasing lakes and ponds in various sections, she was able to keep a continuous supply of the

fresh flowers.

Hundreds of people are employed in their care and carloads of the fragile flowers are shipped in refrigerated cars to her laboratories in New York and Canada

BANKERS REPORT DROP IN SAVINGS

Lure of Stock Market Partly to Blame, but Slackened Speculato Thrift.

The first recession in the naton's savings account in banks in the twenty years during which records in this field have been kept by the American Bankers Association was disclosed for last year in the recent annual compilaprepared by its Saving Bank Division. The shrinkage amounted to over \$195,000,000, on the basis of figares for the year ending June 29, 1929. whereas a year earlier the reported increase was over \$2,300,000,000, the largest ever recorded. The number of savings depositors also decreased during the year covered by more than by mobsters after the shooting, held 500,000 accounts. The lure of the stock market and affiliated activities are cited as part of the explanation

for these changes. The association's statement says trust companies of continental United States on June 29, 1929, stood at \$28,-217,656,000. The recession in savings, it declares, indicates a fundamental change in the savings situation, irrespective of whether it is temporary or

How Savings Used to Grow ,

"In 1926 savings deposits increased \$1,562.000,000, in 1927, almost \$1,400,-000,000 and in 1928 over \$2,300,000,000," it says. "It appears now that some influences in one year have taken the gain that might reasonably have been expected in savings deposits for 1929 and lowered them from the high mark of the preceding year. This recession is not one coming as a result of drouth, famine, unemployment or conditions outside of the United States.

"A year ago it was stated: 'The year largest gain in savings deposits in banks and trust companies of contlnental United States ever recorded in the history of this country.' What a difference one year makes! From most 200 millions!

"The loss in savings deposits is reflected also in the loss of savings depositors. The year 1929 showed a total of 52,664,127 depositors, against 53,188,348 for 1928, a loss of 524,221. "Industrial production was much

year. Factory payrolls were considerably greater. In production, employment and trade, advances were made over the preceding year. In the was prosperous.

The Causes of the Drop

any reason to doubt that one of the important factors draining away savings and decreasing depositors has been the lure of profits to be made in of companies. During the last few years there has been a specious phiosophy preached that panics such as formerly occurred were no longer possible.

savings, then a factor in future savings will be the success attendant upon this venture of savings depositors in stocks. If the experiment did not prove generally successful, then another year will doubtless witness an increase in savings deposits as well as in savings depositors."

HELPING YOUNG FOLK TO BECOME BANKERS

Through the American Institute of Banking, which is the American Bankers Association's educational section, the banking profession is educating 35,000 bank men and women in the technical and scientific departments of their work. These students are enabled by this institute, which is entirely non-commercial in its operations, to obtan a grasp of the finer points of banking without interrupting their employment or interfering with their earnings, in their bank jobs. The courses given, including bank-

ing economics and law and bank ad-ministration in all the departments, have been worked out under the di-rection of senior college educators and the lectures are always given by practical men, such as lawyers in the legal courses, experts in banking operations and college professors in the economics courses. There are chapters with meeting rooms in over 200 cities and also a number of smaller study groups are fostered with correspondence aid.

It has been said that the A. I. B., as it is familiarly known throughout the banking field, is the greatest adult educational organization in the world and is supplying the banking business with the largest supply of trained workers each year that any comparable line of business is receiving. The organization holds an annual convention attended by hundreds of young bank workers as well as senior bank officers actively interested in furthering the institute's educational work, at which numerous technical subjects f practical banking application are presented and discussed. This year's convention will be held at Denver, Colorado, June 16 to 20.

ALABAMA'S LATEST OUTBREAK

Alabama is the latest state to have its good name smeared with blood as the result of a race battle which started July 4 and continues with a casulty list of six, includtion Expected to Bring Return ing four negroes and two whites, representing the toll exacted by the prolonged reign of lawlessness and

disorder. An argument over the sale of a baseball bat precipitated the trouble Friday. After the bat had been taken from a young negro who was alleged to have failed to pay for it, the former purchaser returned with his father and two brothers. An altercation followed, and the white merchant who had taken the bat was shot down, fatally wounded.

One of the negroes was captured until night and then taken to the woods and lynched. The other three, in the mean time, had made their escape. The five remaining casualthat savings deposits in banks and ties occurred in a series of battles between blacks and whites as posses iontinued to scour the surrounding country for the assailants, who are believed to have escaped into Mississippi. The last two victims of the rioting were a negro man and a negro woman. The man was killed when he was encountered in a railroad station and instead of obeying a command to hold up his hands is alleged to have opened fire. The woman was struck when a rain of bullets fell upon her hisband's car after he had disregarded the posse's command to halt.

While the battles have continued over a period of several days, there is virtually no mention of efforts of authorities to prevent further bloodclosing June 30, 1928, registered the shed or to conduct the search for the wanted men in an orderly and legal manner. The negro lynched on the first night of the trouble was held by the mob throughout the a gain of more than 21/4 billions of dol- afternoon and early evening. Yet lars in savings deposits to a loss of al- there is no reference to officers in the dispatches other than the statement that "the sheriff and his deputies arrived later." There is no indication that they undertook to uphold the majesty of the law or that any thought was given to the dishigher last year than the preceding patch of troops into the trouble zone in an effort to quell the disorders, aid in the search or afford protection to negro suspects who might be farm areas the improvement noted for captured. Between the lines of the 1928 did not recede in 1929 and the news dispatches covering several livestock industry in all its branches days' outbreak, there is the inference that authorities preferred to let the posses and negroes shoot it out, "The causes of the recession are especially since the latter appeared possibly multiple. There is scarcely to be getting the worst of the argument.

In the light of such developments and with the manifestation of such stocks. For a number of years the a spirit, engendering racial feeling people have been regaled with stories and prejudice, it may be that Alaof profits made in stocks in all types bama will re-elect Senator Thomas J. Heflin after all -Greensboro Daily

Regardless of weather conditions, If it was the lure of profits in a more determined fight will be made stocks which caused the recession in on the boll weevil in Cumberland county than ever before, reports the farm agent.
