### Campbell College Offers Scholarships

Buie's Creek, Aug. 16.—Scholarships to Campbell College have been offered the three runners-up in the finals of the fifth annual essay contest of the North Carolina Cotton Growers Cooperative Association, Dean L. H. Campbell has announced.

Runners-up who have been offered free scholarships are: Mildred Price, of Garner; Pauline Hill, of Stony Point, and Mildred Davis, of Pendleton. Miss Price has already accepted her scholarship and Miss Davis, who still has two more years in high school, has written Dean Campbell that she hopes the offer will still be in force when she has been graduated from high school.

"We made the offer," Dean Campbell said, "because we are anxious to have such worthy young people as we know these three to be to attend our college." Mr. Campbell attended the final contest in Raleigh and said he was very favorably impressed with the high quality of the essays delivered.

John Ousley, of Buie's Creek, who wrote his essay under supervision of Dean Campbell and won first place in the contest in which more than 7,000 participated, has announced he will attend Campbell this year. Ousley was awarded first prize of \$50 and a scholarship to the North Carolina college of his choice.

### Co-Op Members Are Pleased With Checks

Raleigh, Aug. 15.—Letters received here indicate that members are well pleased with the settlement they recently received from the North Carolina Cotton Growers Cooperative Association on 1931 seasonal pool cotton.

Checks totalling \$166,000 were recently mailed members by the association and the money is serving the farmers in good stead as they go about harvesting their 1932 crops.

This \$166,000 settlement was supplementary to the liberal advance paid members when they delivered their cotton.

A good income from his grape vineyard from which the fruit is sold in small baskets is reported by Fred Pyronel, Waldensian farmer in Burke County.

### Blalock To Discuss Outlook For Cotton

Raleigh, Aug. 15.—"The Outlook for Cotton for the 1932 Season from a price, production and consumption standpoint" will be discussed by U. Benton Blalock, president of the American Cotton Cooperative Association, at a "cotton meeting" at State College September 1st, in connection with the 30th annual State Farmers' Convention. Following his talk the meeting will be thrown open for questions and more or less of a round table discussion of the 1932 cotton outlook.

Pre-s releases from the college state that two or three thousand farmers and farm women are expected to attend the convention, which will be held August 29th to September 2nd.

Corn grown after lespedeza turned under has not fired nor suffered severely from the prolonged drouth, reports H. E. Kline of Cabarrus County.

### SPIRITUAL BANKRUPTS

Figures and accountants indicate that we are financially bankrupt—economically prostrate. Debts and obligations on government, institutions and individuals have piled up and we cannot pay. The brief definition of this condition is "depression." Because the wheels of industry move sluggishly and business is not brisk, we cover the whole category of our ailments under the single item—"depression."

Now it begins to appear that we are "spiritually" bankrupt, also. We say "appear," because we are just beginning to see the outward evidences, the obvious consequences of our spiritual bankruptcy. The fact is that spiritual bankruptcy came first, then financial bankruptcy; and now the fruits of both must be eaten. In the days of prosperity, the destroyer came. This is the teaching of Scripture: "In prosperity the destroyer shall come." (Job 15:21.) We lived as if prosperity would abide, and we said with the Psalmist: "And in my prosperity, I shall, I

shall never be moved." But it was in the day of our country's prosperity that the seeds of our bankruptcy were sown—first in the soil of the spiritual, then in the soil of the financial and economic. There were wise ones who were declaring from the pulpit that "America's greatest sin was that of forgetting God." These men were real prophets and the consequences of our sin came upon us. Spiritual depression came first, and was obscured through the pleasures and pursuits of possessions. Now that financial depression has come, we have discovered how thoroughly and completely we are depressed, bankrupt, morally and spiritually. From our prosperity, we were giving God and his cause a "hand-out." We were supporting the work of the kingdom with that which we did not wantonly waste and wish away. We became indifferent to the spiritual cause, and claims of the Kingdom of God, and now, when we are financially unable, we discover how spiritually bare we have become.—J. O. Atkinson in Christian Sun.

### SCIENTISTS DEVELOP "SHATTERPROOF" GRAPE

"Shatterproof" grapes is one of the latest accomplishments of scientists of the United States Department of Agriculture and one which may save grape growers of the United States thousands of dollars annually.

Shippers lose large sums yearly from grapes which "shatters" or break from the stem, in transit. Dr. Charles Brooks of the department has discovered in laboratory experiments that subjecting the grapes to carbon dioxide gas before they are placed in the refrigerator car prevents much of this shattering. He has applied for a public-service patent which will make the method free for anyone to use.

Carlot shipments of grapes in the United States have averaged more than 69,000 for the last 10 years and department officials believe that general use of the new method may save the grape growers large sums of money every year.

### UNWARRANTED CRITICISM

When "Our Bob" was running around the State in hot pursuit of the Democratic nomination for the Senate he saw fit to criticize rather harshly the Reconstruction Corporation. In doing this he was merely following the example of various demagogues.

The Reconstruction Corporation was established by the votes of Democratic and Republican Congressmen and is really a non-partisan measure. It has saved thousands of banks, a good many railroads and insurance companies and has benefitted millions of people, the entire population of the United States in fact. The Reconstruction Corporation has been endorsed by former Governor McLean of North Carolina and many other leading financiers and statesmen throughout the country. Mr. Reynolds was a little hasty in making his criticisms. —Beaufort News.

Alleghany farmers recently sold 41 hea of steers at an average price of six cents a pound.
