A Carolina Teacher Wrote A "First" Textbook More Than A Century Ago

Textbook writing is not a new fad resulting from the twentieth century popular education; for the first text written in North Carolina was published in Halifax in 1796, exactly one hundred and forty-five years ago.

Henry Patillo should be better known among "tar heel" citizens, for he holds the honor of being first and merits recognition as the "father" of textbook writing in North Carolina.

A brief biography would include the story of his Scottish birth, his coming to Virginia about 1740, and his being a preacher and teacher in Orange and Granville counties.

Patillo's work as a teacher was valuable experience and helped prepare him for writing his *Geographical Catechism*. He conducted schools at Hawfields, Williamsboro, and Granville Hall until his death in 1801. He was a prominent citizen of his day and received recognition in many ways. Governor Tryon selected him as one of the men appointed to pacify the disaffected Regulators. He was likewise a delegate to the Provincial Congress that met in Hillsboro in 1775.

According to the author, he wrote this textbook, the *Geographical Catechism*, to smooth the way to the study of Geography; to improve the reading of farmers and their families; to lead common readers to some more just conception of the divine works; and earn a few dollars which he said would be "welcome guests" when they arrived.

The *Catechism* was a fascinating book which took the students for a trip around the world. The questions and answers revealed interesting information concerning the earth, stars, and various phenomena of nature.

Quotations from Patillo's book are appropriate for modern patriotic literature. We feel today as he did when he wrote: "We come in the last place to the freest, happiest, most plentiful part of the globe; and the farthest removed from tyranny, wars, and those commotions that curse and agitate the nations.... A country in which religion is unrestrained; morality in repute; education promoted; marriage honorable, and age revered."

"Q. Pray Sir, where lies this terrestrial paradise?"

"A. Within the limits of the United States; and the spot you stand on, makes a part of it."

Since the days of Socrates the question and answer plan of teaching has been one of the most important factors in effective teaching. New ideas come and go; but none have eliminated the use of sentences that require the question mark at the end.

Lola—Does my gown look as if it were falling off my shoulder?
Hayton—No, let's dance.
Lola—I'm sorry, but I must go and arrange it. It's supposed to look that way.

The Doctor—"Mrs. Brown has sent for me to go and see her boy, and I must go at once."
His Wife—"What is the matter with the boy?"
The Doctor—"I do not know, but Mrs. Brown has a book on what to do before the doctor comes, and I must hurry up before she does it."

William Branch of Selma was given 90 days on the roads for operating a car while intoxicated, the road term to be suspended upon the payment of a \$50 fine and the cost. The cost is to include \$20 for the benefit of the prosecuting witness.

So That's The Law!

By ELLIOTT H. MARRUS

INSANITY AND MARRIAGE

In 27 states, insanity is not a ground for divorce...Connecticut law provides that the estate of an insane husband must pay alimony to the divorced wife, but if a man divorces his insane wife in that state, he need not support her...Indiana has a statute which permits the State to sterilize a lunatic if necessary...In Missouri, a divorce from an insane spouse can only be obtained if the spouse was insane before marriage and had concealed that fact...No state forbids the cohabitation with an insane husband or wife even though doctors say that such cohabitation is bad...In 1941, Maryland and Texas made insanity a legal cause for divorce. Similar laws failed to pass in New York and Iowa...In Wisconsin a divorce cannot be granted on any grounds until the insane mate has become sane...In many of the states in which divorces are not granted for insanity, often annulments are secured for that reason...Bert Lahr, the movie comedian, had his marriage annulled last year in New York on the ground of his wife's insanity. He has since remarried....

TRAFFIC RULES

There was no federal regulation of airplanes until 1926...In 1938 the Civil Aeronautics Authority, commonly called the CAA, was formed to "promote development and safety and to provide for the regulation of civil aeronautics...The CAA has gone so far as to set up traffic rules for the air. One of these states:

"When two aircraft are on crossing courses at approximately the same altitude, the aircraft which has the right of way and other aircraft shall give way."

Some more about the greatest law makers of history...Lycurgus (850 B. C.) wrote a new constitution for ancient Sparta. The story is told that he made the citizens of his country promise not to change these laws until he returned from a trip. According to legend, he went away and committed suicide so that the laws would never be altered...Draco (600 B. C.) codified the laws of Athens. These were known to be very severe laws...Solon (550 B. C.) is often called the "father of democracy." He modified Draco's laws making them more democratic...Confucius (500 B. C.), often called the wise man of China, sought to reform the rulers rather than the laws themselves. He has had
