

INTERESTING THINGS THAT THE GRADES ARE DOING
OUR POSTERS

In our room we made seven posters which we used in our Fire Prevention Program on last Friday. All of the posters were done in cut paper or crayon medium.

One poster showed a safety crusader on a horse. Another showed firemen putting out a fire. Still another one showed a soldier guarding a match with the words, "Guard the Match". Another one showed the total fire losses. The other one showed three mountains and the poster said that "Safety Must Top Them All". The last poster said, "Prevent Fire-- Clean Up" and it showed a little girl and boy cleaning out the closet. We thought that these posters were very pretty

WHAT WE ARE DOING IN OUR ROOM

We are studying Indians in our third grade. We have studied about homes, food, weapons. We have written stories about them. The next things we want to know about Indian are these: clothing, signals, and how they travel. We like to study Indians, do you?

Anne Julian (3rd)

OUR CLUB

In Miss Highsmith's room we organized a club. We elected Nannie Lou Thorpe president, Stuart Hartley, vice-president, Margaret Stone, secretary and treasurer, Lillie Bell Hooper, program chairman. Doris Saunders, Benny Carroll, and Billy Toret-sky are members of the committee. All pupils in the class are members of the club. Each member is to pay dues of one cent a month. The money is to buy the things that we need in our club.

Margaret Stone (5th)

OUR GOLDFISH

Paul brought two goldfish for our aquarium. Roy brought the aquarium bowl. We are going to take turns feeding them and changing the water. Barbara is doing this now. Doris Jean brought some food for the fish. We have named them Swimmy and Jimmy.

COLD WINDS

When cold winds begin to blow,
Then the leaves begin to go.

SOAP AND WOOD CARVING

For our history homework on Greece some of the boys and girls carved daggers, temples and bowls out of soap and wood, while others drew ships and maps. We had a very good time doing it. So that others might see the work, we put the best on a table in our room.

Elmer Kennedy (6th)

RED BIRD

Red Bird is an Indian. He lives in America. He likes to shoot his bow and arrows. Red Bird likes to kill bears and wolves. He likes to kill deer and fish too. We like to read about him.

Richard Crowder (3rd)

OUR STUDY OF THE GREEKS AND ROMANS

In history, we have been tracing the progress of civilization from the far east westward. We have studied about Greece and are now studying about the Romans. The Greeks loved beautiful things. They were divided into city states with democratic form of government. The Romans loved law and were united. All the time they were conquering some place. A great empire was finally formed. The Greeks and Romans left us art, literature, and law.

BUILDING A CITY

We are making a city in our room. These are the things we are going to make: a playground, police station, school house, church, fire station, hospital, grocery store, bakery, post office, and dairy. We are working on our school house now.

THE LEAVES .

The leaves are red and gold and brown,
They dance and whirl and hit the ground.
