**SUPPOSE YOU COULD DECIDE, TONIGHT,** just how the government should spend your tax money. You would certainly want it used to keep America's defenses strong. But is there any point in having it spent needlessly, in other fields? Some people want the federal government to pour a lot of your tax money into more electric plants and lines. This is unnecessary, because the investor-owned electric light and power companies—like this one—can supply all the additional electric power a growing America will need. Why should anybody insist on using your money for a job that can be done without tax spending?
