

# Weather in June Cool

The weather wasn't as hot in June as it should have been, but a few days--notably the 10th--turned out to be hotter than usual. The month's average temperature was 74.9 degrees while the normal figure for June should be 77.9.

The hottest day of the month saw the mercury rise to 97 degrees which was two degrees above the mark set in 1962 when the top figure was 95

on the 24th of June. The coolest temperature recorded was 54 degrees on the 22nd as compared with 55 degrees on the 10th of the month in 1962.

The figures quoted above were furnished by Frank B. Boyette, who is superintendent and official weatherman at the Coastal Plain Vegetable Research Station at Faison.

Rainfall measurement last month wasn't quite up to standard either since only 3.96 inches were recorded. Normal precipitation for the month is 4.84 inches, Boyette reports. Rainfall in June 1962 was 7.81 inches.

However, the rain that did

fall helped to keep the year well above the normal mark of 21.67 inches. The 1963 total to date is 23 inches.

### A GOOD LESSON

Lansing, Kan.--Seven youths, ranging in age from 16 to 22 were convicted in police court for breaking car windows.

The Judge directed that they spend part of the day in prison. The prison chaplain met them at the gate and gave this brief description of the prison:

"As near hell as you can find on this earth."

After the experience of eating, exercising and staying in a cell, the group left the prison in a sobering mood and vowed they would think before breaking the law again.
