Q. How is formula different from ordinary cow's milk?

A. In a way that could be very important to your baby until he's at least a year old. Formula is designed to contain the same essential nutrients in the proportions that human milk has. Cow's milk is designed for calves and does not have the proper amounts of all the nutrients babies need.

Many minerals and vitamins are found in cow's milk in only very small amounts. Fats found in cow's milk are not easy for babies to digest. In addition, formulas such as Enfamil are heat-treated so that the protein they contain is more easily digested.

Knowing the difference between formula and plain milk may help make a difference between a child who's a little peaked and one who's at the peak of health.

Miss Jo Silverthorne. The honoree was presented gifts in her chosen china. A lunch of steak, assorted vegetables, hot rolls, jello, peach cobbler and coffee was served.

## Kristie Russell appears on T. V.

Miss Kristie Russell and her mother, Mrs. Alan Russell of Askin, have been very busy lately in carrying out Kristie's duties as Little Miss United Way for Craven County for 1978-79.

Kristie has appeared on WITN-TV in Washington early morning show, "Almanac" and WNCT-TV in Greenville show, "Carolina Today." In Washington she was presented a trophy for her contributions to the United Way.

Kristie and Mrs. Russell attended a kick-off breakfast at the Ramada Inn in New Bern the beginning of

the month where Kristie was presented a U.S. Savings Bond.

Also, they attended a luncheon at the Evaluation and Training Center in New Bern.

Mrs. Russell says Kristie is enjoying her reign as Little Miss United Way and "we know her progress will probably be slower than the average child and her seizures will always be a threat but right now the future looks bright and hopeful to us."

The Russells would like to thank the United Way and the people who contributed to this cause.
