

ROGER FORREST FOR CRAVEN COUNTY COMMISSIONER

The future is for those who prepare for it! In the coming years, our county government will be faced with new responsibilities, new demands and changing service and program needs on limited financial resources. This means that some difficult choices must be made by our citizens if we are to play a role in shaping the future of Craven County:

A future which means that our older adults are helped to remain independent and active.

A future which means that our children — our greatest resource — are educated and prepared through a sound educational program.

A future which brings about a closer and better working relationship between county and municipal governments in order to find more effective ways of doing things together to save tax dollars.

A future which deals with the problems of our farmers, businesses and industries.

A future which deals with the problems of the environment.

A future which deals with the problems of law and order, roads, trash collection and disposal through proper planning and positive action rather than costly inaction.

A future of county government which will encourage citizen participation and which will allow full and free interchange of information between citizens and their elected representatives.

A future of growth and progress within the current tax structure of the county government. As demonstrated by the recent school bond referendum, Roger Forrest has always insisted that expenditure of the taxpayer's money be subject to the taxpayer's approval.
