

CHURCH

1984 GRADUATES—Palmetto F.W.B. Church honored 1984 graduates on June 10th. Each graduate was presented a gift from the church. Shown left to right: Lynn Drake, Joy Parker, Buddy Whitford, Sunday School teacher, Maria Urrejola, Exchange Student from Guatemala who is living with Mr. and Mrs. Milton Gaskins and Lisa Arnold, visitor.

Tabernacle Holiness Church News

Weekend Revival

Yes, starting July 4, through the weekend the Tabernacle Holiness Church will hold a revival nightly at 7:30 p.m. with Reverend Larry Small. Each and everyone is cordially invited to come out and meet Brother Small and his fine family and let's worship the Lord together. Brother Small is a man called by God to preach the Gospel. He is very concerned for the young and old alike. Special singing nightly. Let's make a joyful noise unto the Lord with song and praises.

Glenda Lewis

Rev. and Mrs. Larry Small

Bible School is now in progress from 7-9 each night. Come and bring your children.

There is also an Adult Bible class.

Classes will continue through Friday night.

Get acquainted Revival by new pastor, Rev. Larry Smith beginning July 4-8. Service each night at 7:30.

Dinner in Fellowship Hall on Sunday.

Regular Service:

Sunday School - 10:00 a.m.

Morning Worship-11:00 a.m.

Evening Service - 6:30 p.m.

Wednesday night prayer service - 7:30 p.m.

You are invited to worship with us.

Hot, Lazy River Algae Breeding Ground

The slower the Neuse River flows across North Carolina's coastal plain, the greater the chance of it developing unsightly and potentially harmful algal blooms, say a pair of biologists from East Carolina University.

Drs. Robert R. Christian and Donald W. Stanley say the growth of *Microcystis* algae that periodically paints the river between Goldsboro and New Bern with a blue-green scum is triggered by a combination of low water flow and by the presence of nutrients that trickle into the river from farm fields, and from urban and industrial sites. The scientists hope to further verify their observations and devise a method of predicting the occurrence of algal blooms in research they are conducting on the river this summer.

Algal blooms become a nuisance about once in every three years and only during the months of July and August. Christian noted. When it occurs, it affects an area of the river starting near the Cliffs of the Neuse in Wayne County stretching to within a few miles of New Bern. It covers the river with a smelly, blue-green scum that may be responsible for fish kills and threatens the use of the river for fishing, boating, drinking water and for agricultural and industrial purposes.

"In 1982, we were out there and there was no bloom of algae in the river even though the concentration of nutrients in the river was very high," Christian said.

"In 1983, the water was essentially the same in terms of nutrients but there was a massive bloom of algae," he said.

"The one big difference between the river in those two years was the actual flow of the river. In 1983, the river's flow was much slower than in 1982," Christian said.

He noted that there are a couple of factors at work. One is that when the river is in a "low flow condition" the algae floats to the surface where it gets more light which enhances its growth.

"The other factor and the one in which we'll be studying this summer" he says, "is the fact that when you have low flow, the water stays in the river longer giving the algae more time to develop."

In their study, the scientists plan to examine the growth rates of the algae under a variety of light and temperature conditions and compare it with dilution rates and times of travel for a variety of river flow conditions.

The ECU scientists have received a \$24,085 grant from the Water Resources Research Institute for further study of the relationship between river flow and blue-green algal blooms in the Neuse River. The grant is a continuation of a Neuse River algae study begun by the scientists several years ago.

Christian is an associate professor of biology at ECU and Stanley is an associate scientist with the ECU Institute for Coastal and Marine Resources (ICMR).

Happy Birthday

June 28:
Candy Caldwell
Leonard Taylor, Jr.

Obituary

FLOYD MATTHEWS

Mr. Floyd A. Matthews, 58, died Saturday, June 23, at his home in Vanceboro.

The funeral service was conducted at 3:00 p.m. Monday in the Wilkerson Funeral Chapel at Vanceboro by Rev. Larry Small, Tabernacle Holiness Church & Rev. Earl Smith, New Hope Holiness Church.

Burial was in the Vanceboro Cemetery.

Mr. Matthews, a native of Craven County, spent most of his life in Vanceboro. He was a veteran of World War II having

served in the U.S. Navy. He had been employed by the Craven County Schools Maintenance Department for 15 years. He attended the Tabernacle Holiness Church.

Surviving are a step-daughter, Mrs. Hilda Carmady of Grantsboro, N.C.; a step-son, Robert S. Tripp of Rt. 2, Vanceboro; three sisters: Mrs. W.L. Ipock and Mrs. Linwood M. Lewis both of Vanceboro and Mrs. Lillian M. Gaskins of Rt. 2, Vanceboro; and four step-grandchildren.
