BILL BARKER ON EDUCATION

The proper education of our children is vital to the health and growth of our communities. Citizens who have obtained a good education generally become a productive asset to our society. Those without the benefit of education generally become a burden to our society.

The Education of our youth is one of the basic building blocks of a stable social structure and therefore should be one of our highest priorities.

=N.C. SENATE=

Paid for by the Bill Barker for Senate Committee.
