Cleveland's Son Hissed

Francis Grover Cleveland, son of the former President, acted his part as villain so well in a play at Boston the other evening that he was hissed . . . "which pleased me immensely", said Mr. Cleveland, "because hisses for a villain means applause."

South Rosemary P. T. A. Meeting

On last Wednesday evening at the home of Mrs. W. H. Shell in South Rosemary, a Parent-Teachers meeting of the South Rosemary School was held. Mrs. W. W. Martin, field worker for the State Parent-Teachers Association spoke. Following Mrs. Martin's talk a sweet course was served by the hostess to the following teachers and parents: Mesdames W. W. Martin, T. B. Turner, A. M. Powell, R. M. Hudson, J. O. Hockaday, E. R. Hawkins, J. B. Ball, J. V. Moore, Mr. and Mrs. W. P. Cook, Mr. and Mrs. M. E. Faison, Mr. and Mrs. S. D. Knight, Mr. and Mrs. J. R. Harrison, Mrs. Atha Smith, Misses Viola Glover, Merle Bell and Annie Cherry.

ILLUSION:

This very old illusion was invented by Indian fakirs. The secret was unearthed in 1849 by the great magician, Robert-Houdin. At that time, ether had just been discovered, and little was known about it. Houdin claimed that he had discovered that this new anesthetic could make people light as air. To prove it, he caused the subject to rise into the air and float apparently suspended. He passed a hoop around the body to show there were no wires or supports.

EXPLANATION:

There are many, many explanations for this old trick. One is that the girl wears a concealed harness, which ends in a socket between her shoulder blades. This is attached to a piston below the stage. The piston is pushed up from below, causing her to rise in the air. The piston is invisible, because it is covered with mirrors which reflect surrounding draperies, similar to the background. The magician can pass the hoop over her body because it is cut in one place. It can be pulled apart for a second when it passes the piston.

It's fun to be fooled —
...it's more fun to KNOW

Another "magic show" is cigarette advertising.

One of its greatest tricks is the *illusion* that cigarettes can be made miraculously "MILD" through manufacturing methods.

THE EXPLANATION: All popular cigarettes today are made in modern sanitary factories with up-to-date machinery. All are heat treated—some more intensively than others, because raw, inferior tobaccos require

more intensive treatment than choice, ripe tobaccos.

The real difference comes in the tobaccos that are used. The better the tobacco, the milder it is.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

This is why Camels are so mild. This is why Camels have given more pleasure to more people than any other cigarette ever made.

It's the secret of Camels' rich "bouquet" ...their cool flavor...their non-irritating mildness.

All the natural, ripe goodness of Camel's tobacco is kept fresh for you by the famous air-tight, welded Humidor Pack. Don't remove it.
