Opposition To Appointment Of Frank McNinch

O. M. Mull, Democratic State chairman in 1928, when the State went "hell-bent for Hoover", has voiced his opposition to appointment of Frank R. McNinch, Charlotte, as chairman of the Federal Power Commission, on which he has served as a member for two years. The appointment has been made by President Roosevelt and after President Hoover had named McNinch as a Democratic member. McNinch headed the Anti-Smith committee in 1928 and is credited with much of the work which caused the State to vote against Smith and for Hoover. A stormy petrel.

Former sentence not having been complied with in the case of Willie Lawrence Alston, who was tried for assault with deadly weapon, it was ordered that defendant be sent to the roads for ninety days if costs are not paid by July 28.

"Fisher Controlled Ventilation"—here's a magic phrase that means more than you can believe till you've experienced it yourself.

This one feature alone would make Pontiac an outstanding car compared with others at or near its price.

But Pontiac gives more. It is a Straight Eight, with a 77-horsepower engine that gives 78 real miles per hour.

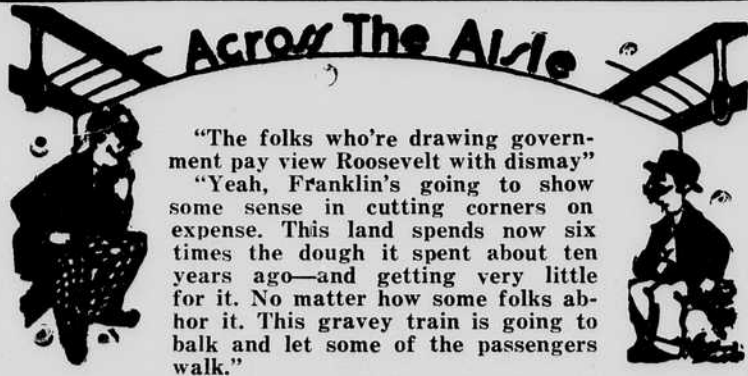

It is a big car—115-inch wheelbase, and due to its balanced weight and design, it gives you safety, comfort, durability and the operating economy of 15 miles to the gallon. Ask any Pontiac owner.

Try a demonstration. And don't forget that it takes a Straight Eight to give Straight Eight performance.

"The folks who're drawing government pay view Roosevelt with dismay"
"Yeah, Franklin's going to show some sense in cutting corners on expense. This land spends now six times the dough it spent about ten years ago—and getting very little for it. No matter how some folks abhor it. This gravey train is going to balk and let some of the passengers walk."

A good way for an individual to get on a real gravey train is to invest in Roanoke Rapids Building & Loan shares. You'll be "sitting pretty" when they mature.
