

### Release Information Pertaining To Taxes Imposed On Cotton

Commissioner of Internal Revenue Guy T. Helvering has released the following information pertaining to the taxes imposed under the Agricultural Adjustment Act with respect to the basic agricultural commodity, cotton.

The tax on cotton will take effect at the beginning of the marketing year which has been proclaimed by the Secretary of Agriculture as the first moment of August 1, 1933. The rate of tax prescribed is 4.2 cents per pound on the net quantity of the lint cotton, that is, cotton which has been ginned, at the time it is put into processing or manufacture. In determining the net weight the tare, or weight of tatches, ties and the jute or other bagging, should be deducted from the gross weight of the bale. All cotton in process, at the moment the tax takes effect, including yarn, fabric, thread, twines, roving, silver, laps and all other forms, will be taxed at the rate of 4.4184 cents per pound.

The cotton content of any processed product of which cotton is the component of chief value which is held for sale or other disposition on the effective date whether in the hands of processor, manufacturer, jobber or wholesaler will be taxed at the rate of 4.4184 cents per pound. The same rate of tax will apply with respect to separate retail stocks of cotton products held by a retail dealer on the effective date providing such products are not sold or disposed of within thirty days after the effective date.
