The new concrete curb in the South Ward is just about completed, except those portions where garages and filling stations are dickering on driveways. It is said the ditching will be much less there. They have the 30 foot road in the center now which does not completely block out traffic. One side can be laid just as soon as the weather permits.

The two old Canadian ladies, injured six weeks ago at Halifax curve, on their way South for the Winter, were able to leave the local hospital yesterday after 40 days confinement. They suffered concussions and injured backs.

Robs 2 Stores

B. MARKS, ROSE'S ENTERED

Photos of fingerprints found in the B. Marks Store and Roses 5 & 10 after they were entered Friday night had not been received today by local police, but they are convinced the same persons broke in both stores.

The B. Marks store was entered first and on leaving the thieves took with them a screwdriver belonging to the store. This same screwdriver was found in Roses.

Whether the same ones stole the automobile of Dr. Bahnson Weather's is not known, but the car was found Saturday at Enfield.

Jim Dorsey, fingerprint expert from the State Prison, was sent for by city authorities. He was able to get some fairly good prints at the Marks store, but was not so fortunate at Roses where fingerprints had been obliterated by those opening the battered safe.

The thieves entered the B Marks store thru a second story window and ransacked the store. About ten dollars in change was taken from a cash register, a gold fountain pen, a gold watch and some ear rings. It is possible a small amount of merchandise was taken but what they were really after was money.

They searched a desk, throwing papers about, and tried on various garments from the racks, mostly sweaters and overcoats.

Rose's was also entered by a rear second story window, where thin bars were bent aside. The safe was badly battered but the thieves failed to get into it.

Four Bitten By Dog

an boys' head. Later in the day, Russel Pearson, 12-year old boy was bitten by the dog as he went within reach of where the dog was tied.

Officer Dobbins shot the dog about noon Monday. The head was sent to Raleigh for official analysis, and a telegram from there received by local authorities last night stated the dog was definitely suffering from hydrophobia, or rabies.

All four children are taking the treatment, it is said, and the cow that was bitten is being kept under close observation. Mrs. Pearson says she would have been perfectly willing to have had the dog killed after he bit the first child, but altho' the accident was reported to officers, she did not know about it until sometime Saturday after two more children had been bitten.

When it comes to feeding . . .

YOUR CHILDREN AND YOUR CROPS

are pretty much alike!

● Strange as it may seem, your own children and your own crops aren't so different. When a child eats too large a proportion of artificially refined foods, there is danger of lack in vitamin B, so essential to growth and health. If he doesn't get vitamin A, he "catches" infectious diseases. Too little vitamin C, and other diseases result.

And with your crops, the so-called impurities are like vitamins for children—absolutely necessary to healthy

growth and normal development. Chilean Natural Nitrate supplies the vital impurities—in Nature's own balance and proportion. Calcium, iodine, strontium, boron, potassium, sodium, lithium—they're all there, to make your crops healthy and profitable.

Protect yourself by saying "Chilean" when you order your nitrate. Two kinds—Champion (granulated) and Old Style. Both are genuine. Both are Chilean, and both have the vital impurities.
