SUNDAY DINNER Suggestions

By CORA ANTHONY
Director of A&P Kitchen

TURKEY and leftovers now seem further in the past than Christmas in the future. Simple wholesome meals will be the rule for the next few weeks. Pork is now the most economical meat though beef, lamb, veal and smoked meats are all moderate in price.

Butter has risen in price for the first time in five months, but is still remarkably low for the season. Egg prices are expected to drop just as soon as last spring's chickens start to lay. A mild open season usually encourages this state of affairs. Cheese remains one of our best and most economical foods.

The cabbage family and citrus fruits are abundant and most attractively priced.

Three Sunday dinner menus follow:

Low Cost Dinner	
Fresh Pork Shoulder	Brown Gravy
Browned Potatoes	Scalloped Cabbage
Bread and Butter	
Apple Pie	Milk
Tea or Coffee	
Medium Cost Dinner

Ten Years of Service to American Farmers

ARCADIAN NITRATE, *The American* SODA, is celebrating its Tenth Anniversary. Ten years ago the first carloads of ARCADIAN left the great nitrogen plant at Hopewell, Virginia. Today its production is a vast Southern industry, contributing in many ways to the welfare of the Nation.

Now beginning its eleventh year, Arcadian is duly thankful for the vision and the business courage which gave it birth. Proud to be the product of American materials, another era in which it is of even greater service.

You and your fertilizer are responsible for the growth and use of ARCADIAN. Arcadian has, in return, brought you to nitrate users. Arcadian to review the fact that in the past ten years, nitrate has come down some 40%.
