### BIRTH ANNOUNCEMENT

Mr. and Mrs. Jesse E. Pittard, Jr., announce the birth of a son, Jesse Franklin, May 27th, in Enfield. Mrs. Pittard was formerly Miss Sarah Harris, of Aurelian Springs.

### WINS SCHOLARSHIP

Announcement has just been made by Mrs. James Boyce Hunter, Educational Chairman of the North Carolina Division, United Daughters of the Confederacy, that Elsie Sharpe Barnhill, daughter of Mr. and Mrs. Egbert D. Barnhill, of Enfield, was awarded the scholarship to Brevard College.

She is well qualified for the scholarship, as both her grandfathers were in the Confederate Army—M. V. Barnhill as Corporal in the 13th Regiment, and W. H. Leatherwood as 1st Lieutenant in the 62nd N. C. Regiment. Her father is a member of the American Legion having served in the first World War.

The local Chapter, the Frank M. Parker Chapter, U. D. C., feels justly proud of Miss Barnhill's achievement and of Billy Thorne, of Enfield, who is graduating this term from the University of North Carolina on a similar scholarship.

Miss Barnhill is one of the twenty-five graduates of the High School this term, and at commencement, she was awarded the Cottie N. Sherrod Recitation Medal, donated by Watson N. Sherrod, in memory of his mother.

### INSTALL OFFICERS

Members of the Enfield-Scotland Neck American Legion Post were present at a meeting at the Hut in Enfield Tuesday evening, the 10th, at 7:30, at which time the following officers were installed: Commander, C. S. Alexander, Scotland Neck; 1st vice commander, L. W. Ransome of Enfield; and H. G. Barnhill, Whitakers, 2nd vice-commander.

Mr. and Mrs. Wiley Hawkins spent the week-end with her brother in Reidsville.

# COUNTY AGENT URGES MOPPING OF COTTON TO DESTROY WEEVILS

## Boll Weevils Make Appearance In Halifax

County Farm Agent W. O. Davis reported today that boll weevils have been found in two sections of Halifax, and is urging cotton growers to start mopping now.

The Pee Dee Experiment Station at Florence, S. C., Davis said, reports 2,500 weevils for May 1941, compared to 16 for May 1940.

The county farm agent recommends the following treatment:

For each acre of cotton planted, secure three pounds of calcium arsenate and three gallons of black. This will usually be sufficient to make three applications per acre.

Mopping should be started when the cotton plants are approximately five to six inches high, and should be repeated at five to seven day intervals until three applications have been made. If rain occurs within twenty-four hours after an application, that application should be repeated as soon as weather permits. Mopping must be started just as soon as square formation starts.

Prepare the poison mixture for mopping by adding 1 lb. of calcium arsenate to 1 gallon of water and stirring, then add 1 gallon of black stip molasses and stir until the ingredients are thoroughly mixed. Larger quantities may be prepared as desired, using the same proportion as given above. Mix only the amount to be used each day. Stir the mixture frequently.

Apply the poison mixture with a home made hand mop or with an approved mopping machine. The home made hand mop can be made by tying a piece of cloth or sack to one end of a light board, three to five feet long, and about three inches wide. Six inches of the mop cut into strips about one inch wide should be left hanging over the end of the board handle. Each operator must have a mop and small bucket in which to carry poison mixture. Dip the mop into the bucket of poison mixture until thoroughly wet, then wipe the mop on the edge of the bucket to remove surplus mixture. Hold the mop directly forward so that it pushes through the top of the young cotton plants. Walk at an ordinary pace, stopping each time it is necessary to dip the mop into the mixture.
