# OPA MEETING EXPLAINED BY T. S. JOHNSON

### Says Halifax Board In Accordance On Gas Rationing

Theodore S. Johnson, district director of the Office of Price Administration, held a meeting at Halifax last week to which members of the press and others were excluded, explaining to county newspapermen that he would send them a report of the meeting pending his return to his office in Raleigh. He this week issued the following statement to the press relative to the meeting:

"It is well-nigh impossible to carry out the program of rationing and price control to the entire satisfaction of every person. Some people are certain to be denied their requests and to be adversely affected by price control. It is, of course, the obligation of every War Price and Rationing Board to so conduct its operations as to be fair and just and to show no discrimination to any person because of either race, creed or political affiliation. This is a difficult task, and it is the duty of every citizen to uphold

the members of the War Price and Rationing Boards in their endeavors.

"Our check up on the Gasoline Panel at Halifax, a check up which is made regularly at all boards, disclosed that the gasoline issuances at the Halifax Board are more nearly in accordance with the regulations and the policy of the OPA than those of any board which we have reviewed in the last several weeks.

"The regulations provide that whenever any person desires to protest or appeal any decision, or act of the panel members or the employed personnel they will have full, free opportunity to present their complaint to the War Price and Rationing Board through its Chairman. The board is expected to, and I am sure will, give careful and impartial consideration to such complaints. If the complainant is not satisfied with the action of the board, he may appeal to the District Director and, if he desires, to the Regional Office and even to the National Office.

"The War Price and Rationing Boards are established in order to serve the citizens of the counties as conveniently as possible consistent with the funds available for the board operations. Halifax County is one of two counties having three boards. Five counties have two boards each and the remaining forty-five counties in this District are served by one board each. We believe there is a real need for three boards in Halifax

County, and we are confident that the board at Halifax merits the continued confidence and the loyal support of the people served by it.

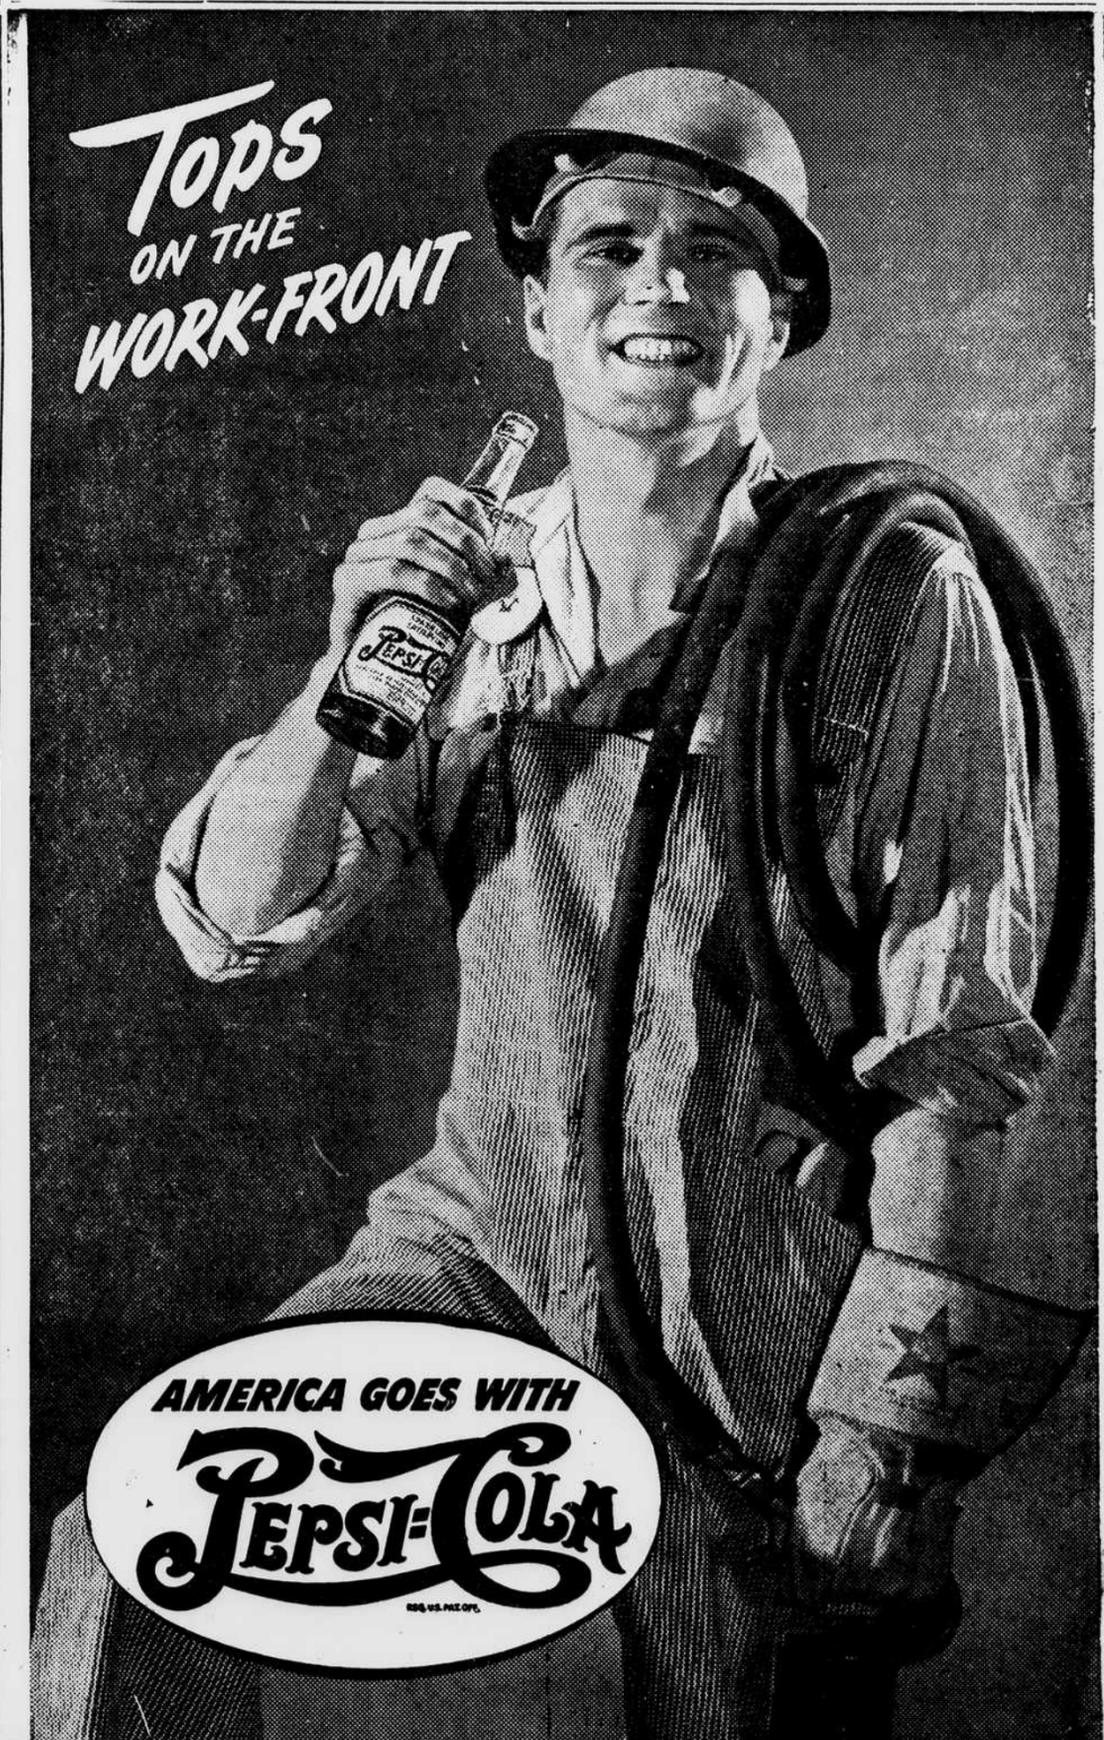

"Very truly yours,  
Theodore S. Johnson,  
District Director."

# Service Man In City Working On Drink Machines

Clayton L. Riker, service engineer of the Gibson Refrigeration Company of Greenville, Michigan, is spending a few days in the city working with Albert Gaskins, local salesman of the Hines Beverage Co., on the automatic "Spac-arv" drink machines operated by that company in local industrial plants.

Riker has had extensive factory experience in installing and assembling the automatic drink dispensers, and recently conferred with Gaskins at a service school of the company in New York City, terminating in his visit to Roanoke Rapids.

The Hines Beverage Company has a number of the machines in local industrial plants and stores, which dispense "fountain made" drinks in several popular flavors, offering patrons a superior drink with "fresher carbonation". The machines have proven to be quite popular locally.
