

MEAT POINT VALUES WILL BE THE SAME

Present point values on rationed meats will continue through September but several important changes have been made on point values of processed foods.

Fruit butters, prune juice and raw dry beans have been reduced to zero point value and point values have been reduced on canned mixed vegetables and certain sizes of tomato pulp and puree.

Point values were raised sharply on canned pineapple juice and slightly on small size containers of tomato juice and all sizes of vacuum packed, whole kernel corn.

Several changes in point values of dairy products were authorized. Processed butter was raised to 12 points per pound but point value of creamery butter remains at 16 points per pound. Point values of all canned milk were raised to 1 point per pound.

Oil Stoves Are Now Restricted

After September 8 ration certificates for oil heating stoves can be issued only to persons who find it impossible to use any other type of stove or to persons replacing another oil stove which is no longer usable.

Ceiling Prices On Ammunition

According to a memorandum received by the local Price Panel of the Ration Board, the following ceiling prices have been placed on ammunition. The prices are: 12 gauge regular load shells, \$1.07 per box; 12 gauge high velocity shells, \$1.38 per box, and 20 gauge regular load shells, 94c.

Lower Gas Prices Allowed By OPA

Reductions in maximum prices of gasoline that will save Tar Heel motorists approximately \$160,000 a month have been authorized by the Office of Price Administration. At the same time OPA authorized reductions in retail prices of kerosene and distillate fuel oil which will mean

additional savings to consumers. In North and South Carolina the maximum price of gasoline was ordered reduced by four-tenths of a cent per gallon and kerosene and distillate fuel oil by three-tenths of a cent per gallon. The reductions, OPA said, were made possible by reduced wartime transportation costs.
