EMPLOYEES EXPRESS PRIDE IN OUR PRODUCT

Harold Key Gay McCallister Bobby Green Dewey Colbaugh Joe Gilbert Beverly Garber David Brown Linda Norton

Bobby Green (Casting), Joe Gilbert (Finishing), and David Brown (Shipping) paused in their jobs on May 18th to tell Fort Sanders Presbyterian Hospital visitors about their individual part in helping to make a quality x-ray film product. Fort Sanders is a Du Pont Cronex® 4 customer.

Bobby Green pointed out to Harold Key and Gay McCallister, Registered X-ray Technologists, that the base produced in his area is made according to exacting standards. His job is to monitor constantly the network of sophisticated control instrumentation and base making equipment to make certain base meets these standards. Good quality base means good quality film after it is coated with photo sensitive emulsion. The customers were impressed.

Joe Gilbert proudly displayed a new "mist white" inner box of 10 x 12 size Cronex® 4 film to Ft. Sanders Technologists Dewey Colbaugh and Beverly Garber. His source of pride was the care taken by him and his fellow workers to make this box of film as attractive on the inside as the outside. He expressed hope that the people at Ft. Sanders found Du Pont film as high in quality as he tried to make it.

David Brown told Technologist Linda Norton about the good quality

film he shipped out. When he inquired whether she used Du Pont film, her answer was, "Yes". He reflected, "If you use it then you know as well as me how good our product is".

These three men not only enjoyed speaking with some pretty visitors from Fort Sanders Presbyterian Hospital, but they told one of our customers how quality conscious they feel about their job. These feelings are reflected in the growing acceptance our film has in the market place.
