

## EXAMINATIONS BEGIN THIS AFTERNOON

## BREEDON WINS COVETED AWARD

### 'Peahead' Walker Presents Trophy To Whirlie Player

Last Wednesday evening at 9 p.m., in the 15th annual Senior High School Football Presentation Night, held each year on the stage of the National Theatre, Joe Breedon was awarded the gold trophy that distinguishes him as the outstanding personality in playing ability and sportsmanship on the Western Conference Champion Whirlwind team of 1946.

Breedon was a leading figure in the Whirlies victorious team and was considered the outstanding player of the year by both the team, who named him for this honor by secret ballot, and the many fans who witnessed the Whirlies in action this year.

Ceremonies were begun in the impressive program to the soft strains of the Senior High School Song rendered by the Band. Highlights of the show were the cheers led by the cheerleaders, the explanation of the purpose of the program by Mr. Wooten, manager of the National Theatre, and the introduction of the many distin-

### Health Week Held From February 2-8

Dr. Clyde A. Erwin, State Superintendent of Public Instruction, has announced that Good Health Week will be observed in all North Carolina public schools February 2-8.

Letters have been sent from Superintendent Erwin's office in Raleigh to all public school principals and superintendents of city and county systems urging their fullest cooperation. During Good Health Week greater emphasis on health as a regular part of the school curriculum is called for by Dr. Erwin.

In his letter to principals and superintendents, Dr. Erwin expresses the belief that much good can be accomplished in stimulating interest and enthusiasm for the Good Health program on the part of school personnel.

"Citizens throughout the State have become aroused to a need for action in solving our health problem by the activities and recommendations of the Medical Care Commission and the Good Health Association," Dr. Erwin points out. "School people will readily recognize the benefits to accrue to school children from a medical care and hospital program such as that ad-

### \$100 Will Be Given In Model Contest

Morrison-Neese Furniture Company has offered a prize of \$100 for the best model of a G.I. home built by any member of the drafting class at Senior.

Boys who are entering the contest, which will close late this month, are: Dennis Fortune, Horton High fill, Rox Stallings, "Chigger" Qualls, Tommy Williams, Glenn Hodges, and Frank Parkes. Plans which the boys are following under the supervision of G. O. Mann were drawn by Henry Zenke, Greensboro architect.

From the plans, each boy first drew six plates of the house, all elevations. They have now started actual construction of the models out of plywood and pine. The finished model will measure 52 inches by 38 inches, all houses being built to a one-inch scale.

Seniors Earl Betts and Mary Reynolds have been elected best citizens by the popular vote of their classmates and teachers.

## Betts and Reynolds Chosen Senior High Best Citizens

### Photography Begun For Senior Pictures

Each year, as soon as Christmas vacations have been completed, each member of the senior class of Greensboro Senior High School is photographed for the Senior class mass photograph. The photography for the picture of the class of 1947 began Monday, January 13, and will continue until each Senior has been photographed.

This year, according to a statement issued by Mr. A. P. Routh, the contracting photographer is the Meyer's Studio and all work is being done in their offices. Late in the spring of this year, each Senior will receive a composite picture of the entire senior class of 1947.

Each senior homeroom has been allotted three days for the completion of the photographs of the pupils in that room. Students with a seventh period study hall are being excused by Miss Blackmon at two-thirty for an earlier appointment than would ordinarily be possible and photography will continue each day until 5 o'clock.

The members of the senior homerooms are being photographed in the following order: 200, 303, 302, 206, 317, 315, 306, 313, 203, and 304.

### 'Playmasters' Is New Dramatic Club Name

According to Frances Sue Marquis, secretary, members of the Dramatic club voted in a recent meeting to name the organization "The Playmasters."

A play has not been decided upon by the club yet due to the interruption caused by the recent holidays. However, they do hope to get started early in February on a play to be presented in the spring.

### Two Students Killed In Sailing Accident

Holiday festivities were saddened on December 29 by the sudden and tragic deaths of two of Senior high's most popular students, John H. Laubheimer, Jr., of 1106 Hill Street, and Clinton Prenzel, 17, of 1203 Latham Road. Victims of a sailboat accident in High Rock Lake, Davidson County, Laubheimer met death as the result of drowning, followed by Prenzel, as the result of a heart attack at the scene of the accident. The other five occupants of the craft escaped with only slight injuries and exposure.

Laubheimer is survived by his parents, Mr. and Mrs. John H. Laubheimer, and paternal grandmother, Mrs. Madeline Laubheimer, and Prenzel by his parents, Mr. and Mrs. George Prenzel, and his grandfather, George Prenzel.

### Routh To Conduct Navy College Test

Approximately 107 boys will be on hand at Senior tomorrow to take an aptitude test in regard to U. S. Naval college training programs, NROTC, and NACP.

The test will be conducted by A. P. Routh and will last approximately half-a-day. Those boys who rate high enough and are chosen by the Navy will be permitted to participate in one of two college training programs. First of these is the Naval Reserve Officers Training Corps. In this program a successful candidate will have his tuition and other expenses paid to anyone of 52 colleges throughout the U. S. These colleges carry the naval program and the candidate will be allowed to major in any subject but he will be required to take a course in naval science and certain other subjects subscribed by the navy. The candidate will remain in college 4 years and then become a commissioned officer in the U. S. Navy. He will remain in the navy for 2 years and then in the reserve for 6 years.

The second program is a Naval Aviation College Program. Requirements for this program are practically the same as the first with a few exceptions. The candidate will have the opportunity to go to any college of his choice. He will spend three years in the Navy instead of two, and he will be a commissioned officer in the Naval Air Corp.

Applications for the test had to be sent to the navy before December 17, 1946. Aptitude tests will be given throughout the U. S. and its possessions.

### Face-Lifting Received By Boys' Gym Floor

"Go to Coach Jameison and get a story on the new gym floor," said the cruel editor, thus leaving the reporter with no alternative but to trudge, in the rain at that, over to the field house for info on the floor. With pencil and paper poised for any forthcoming statements from Coach, we asked the approach question, "How about a story on the new floor!"

After five minutes of jibber-jabber with his fellow athletes he looked up with a half smile and half leer and said, "Its clean!" For a minute we were stunned, bewildered and what have you. "Is that all," we asked meekly. "That's it," replied Jameison. That did it! Sticking our hands deep in our pockets we trudged back to the editor shouting, "I refuse to write a story on two little words! Draw your own conclusions about the story being written. Anyway, students, the floor is clean."

### Sixth Period Exam Beginning at 1:45; Registration Thurs.

Beginning this afternoon at 1:45 will be Senior High's all important exams, for which a majority of students have been feverishly studying for several weeks. Classes will be conducted in their regular order until the beginning of the sixth period exam this afternoon.

#### Registration

For the following three school days students will be required to come to school only to take their tests, after which they will be dismissed.

On Thursday following exams, registration for the second semester will begin, with the seniors coming to register at 9:00, followed by the juniors at 11:00, and the sophomores at 2:00.

#### Exam Schedule

Friday, January 17, 1:45—6th period  
Monday, January 20, 10:30—2nd period  
Monday, January 20, 8:45—1st period  
Tuesday, January 21, 8:45—3rd period  
Tuesday, January 21, 10:30—4th or 5th period  
Wednesday, January 22, 8:45—7th period

To assist students in deciding what courses they should register for, principal A. P. Routh along with members of the faculty has met in assembly with the three classes to discuss and explain the graduation requirements for Senior High and the entrance requirements of North Carolina's colleges and to answer any question that the students may have concerning this subject.

#### Graduation Requirements

Requirements for graduation from Senior High School were listed in the following order:

- English—4 units.
- American History—1 unit.
- Science—1 unit.
- Mathematics—1 unit.
- Electives—9 units.

### Monetti Sails With Antarctic Expedition

A former student of G.H.S., Mr. Michael Monetti, known to many of his friends in Greensboro as Mike "The Mole," is now sailing with the Byrd Antarctic Expedition acting as personal advisor to Admiral Byrd on Supoinfuenza butterflies.

Born in Annabelle, Australia, Mr. Monetti naturally was in Senior's precinct when at the age of twenty-seven, he entered G.H.S. as a promising sophomore. He majored in gunnery, and for three years, held the state junior championship medal for twelve-inch guns. Mr. Monetti was also brilliant in chemistry, his favorite subject, and often he remained far into the night perfecting a process for the manufacture of heroin. Through his experiments in chemistry as related above, Mike earned a scholarship to Mr. A. Capone's Finishing School at Fort Leavenworth, Kansas.

He became interested in his new hobby, butterflies, while vacationing at exclusive Devil's Island some eleven years later. One day, while swimming between Devil's Island and the mainland, "The Mole" happened to notice a beautiful butterfly, which he immediately recognized as the nearly extinct Supoinfuenza and followed it to its haunts deep in the jungle where he studied its habits for the next three years.

He later obtained his M.S. (Master Safecrackers) from Bastille University in Paris and after graduating with highest honors, he enlisted with the Byrd expedition with a rank of chief biologist.
