

Junior Whirlies Conclude Season In First Place

The Junior Varsity Basketball team concluded their season with a 51-41 win over Page's junior Pirates. Their final record stands as 15-3 with their losses being slim.

The game between the junior Whirlies and the Jay Vees from Burlington was far more exciting than the varsity game although the Whirlies dropped the game by one point in overtime. They suffered their other defeats at the hands of Raleigh and Durham. Raleigh who also handed the varsity team a loss beat the Junior Whirlies by only one point.

Being basically a good shooting team, Mr. John Gordy combined a large amount of height to give

them rebound strength. Having two sophomores in the starting lineup to nature did not seem to hinder their potential whatsoever.

Starting for the Jay Vees are John McNairy, Sophomore; Skipper Gardner, Junior; Don Dunn, Junior; Donald Peer, Sophomore; and Steve Blackwood, Junior. Favorite substitutes are Philip Weaver, Junior; and Al Carton, Junior.

The Junior Varsity program has proved especially successful here at Grimsley. Not only does it give the coaches a chance to groom the future varsity basketball teams it also gives its participants a taste of real competition and good sportsmanship.

Whirlies Ed Feller tries in vain to capture the ball away from the Pirate looking for the basket way down court. The Whirlies defeated Page in their second meet by a score of 75-59. In the lower picture Larry Dempsey reclines on the floor but got up long enough to defeat the Bulldogs of Burlington 33-23.

Even An Athlete Can Take Time To Eat

A Career In

Higher Education

By MILTON S. EISENHOWER
President, The Johns Hopkins University

EDITOR'S NOTE: This is one of a series of special articles on various careers being distributed to high school newspapers by The Johns Hopkins University, Baltimore, Md.

A university is a small scale model of our society, and within our 2,000 institutions of higher learning there are a multitude of career opportunities.

The professors and researchers are the heart of the university, charged with its traditional mission of discovering and disseminating knowledge. Because the university has become the crossroads of our modern society—educating millions of students and providing the knowledge for progress in every area of endeavor—the need for teachers and researchers increases every day. Regardless of your interest—be it philosophy or physics—you will find a career in the university as teacher or researcher.

CAMPUS LIFE

The road to a teaching career is a rigorous one, and only those with an insatiable curiosity, a concern for young people, and a dedication to scholarship should set out on it. The rewards of a teaching career, however, are unmatched by any other profession. Although the income is not high, it is increasing. And more important are the unique freedom and the rich intellectual and cultural offerings that you will find on the lively and exciting campus.

As the teaching and research functions in higher education have expanded dramatically in recent years, so has the administrative

function. The university needs an administrative staff to serve the academicians. It must have admissions officers, counselors, placement directors, writers, editors, accountants, businessmen, fund raisers, technicians, secretaries, and many other specialists.

An administrative career offers many of the advantages of the teaching career: the campus atmosphere, the freedom, the involvement in a social institution that is vital to the progress and survival of our way of life.

To prepare for a career in university teaching or research, you must study. Whatever your particular interest, you must become a specialist in it. This means going beyond the bachelor's degree to the master's degree, then to the doctorate, and perhaps even to post-doctoral study. Nor can you stop there, for a teaching career requires a lifetime of study.

SPECIALIZATION

An administrative career also requires specialization. Your expertise in business, or journalism, or personnel work must be accompanied by an expertise in higher education itself.

It is impossible for me to be more specific, for each of you will follow your own desires and talents. I can only say that for me a career in higher education has been demanding but completely satisfying.

Whirlie Words

Continued from Page Six
sides being the most universally played game, basketball is never affected by the weather and is really the easiest sport for a spectator to watch and understand. Although the ACC tournament will be in action at the same time as the 4-A, Greensboro fans owe to the teams and themselves to come out all four nights, not just when the Whirlies play.

Although this editor has already had his chance at picking the winner of the NCAA Tournament, it may be wise to crawl back a short distance on the limb and predict that the champ will be a southern team, Kentucky, Duke or Davidson. These three teams have solid line-ups and great coaches. The South plays some of the best basketball, team for team, in the whole country. Even though the national sportswriters may not give our section adequate coverage, the South's fortunes will rise again and pop through the nets.
