

School 'Search' Winners Include Marian Barber

School Homemakers of Tomorrow in the Betty Crocker Search for the American Homemaker of Tomorrow have been recently announced. Grimsley's winner is Marian Barber, senior.

The highest scorer in each school will participate in State competition. Each winner's test paper will be judged with the papers of all other local winners in the state to determine the two highest ranking girls.

Scholarships Awarded

The second ranking Homemaker of Tomorrow will receive a \$500 scholarship. Highest ranking girls in each state will be named the State Betty Crocker Homemaker of Tomorrow—a title which carries with it a \$1,500 scholarship and an expense-paid trip for the

winner and a school advisor to Washington, D.C., Colonial Williamsburg, Virginia, and Minneapolis, Minnesota.

The school of each state winner will receive a set of Encyclopaedia Britannica.

Winners Selected

At the close of the tour, the judges will announce their selection of the All American Homemaker of Tomorrow—the highest ranking girl among the 51 representatives from the 50 states and the District of Columbia. She will be chosen on the basis of her original test score, a series of interviews and personal observations while on the tour. Her scholarship will be increased to \$5,000.

The three State Homemakers of Tomorrow with the next highest-ranking scores in the nation will have their scholarships increased to \$4,000, \$3,000, and \$2,000 respectively.

This is the fifteenth year General Mills has conducted the Betty Crocker Search. As in previous years, the National Association of Secondary School Principals has included this scholarship on its list of approved national contests and activities.

Since 1954-55 General Mills has awarded scholarships totaling \$1,371,500 to 1,256 girls. Almost 15,000 schools participated in 1967-68.

Test Given

The test was administered during a 50-minute period December 5, in all the schools taking part in the Search. The test consists of objective questions relating to all phases of homemaking and one discussion question.

In planning this scholarship program, General Mills consulted educators to make it of practical educational value to counselors and teachers of social studies as well as of home economics.

Would you believe? The one on the right is Rig Dees, killer with the high school set and winner of the TWIRP King contest. The one on the left is Rig Dees, killer with the bootie and bottle set. Baby pictures were used in the contest last week, in which boys were nominated for the title and voted for with pennies.

Summer Training Available This Year

Summer programs for science training for secondary school students with high ability are being made available for the summer of 1968.

The National Science Foundation and the colleges, universities, and research organizations will sponsor the programs. Approximately 6,000 students throughout the nation will be given the opportunity to enrich their knowledge of science by college-level instruction and research.

Different Types Offered

Various types of training will be offered. Most of the institutions will offer instruction in depth in one or more subjects such as biology, mathematics, or physics. Many of the projects will offer classroom work plus involvement in research laboratory experiences.

To qualify for a science training program a student must have completed specified high school courses in science and mathematics. However, selection will also be based upon scholastic ability and science motivation.

Training programs in North Carolina will be at Bennett College in Greensboro and at the University of North Carolina at Chapel Hill.

Studies in mathematics, biology, chemistry, or physics will be offered at Bennett. Dr. J. Henry Sayles, Division of Sciences, will be in charge of this program.

UNC-CH Participates

At UNC-CH mathematics, computer programming, astronomy, and either chemistry or botany will be offered. Dr. Ronald C. Fitch, Department of Chemistry, will be the project director.

Interested students should contact the above project directors, not the National Science Foundation. Deadlines for applications usually fall between March 1 and April 1, depending on the specific project. Selections will be determined by mid-April.

Just one year ago this month, the construction was begun on Grimsley's new library. The Library has been open to students, except for inventory taken during exams, since the end of October.

International Fellowship Program Sponsors Latin American Students

International Fellowship, Incorporated, is an organization which sponsors an exchange student program of high school students for three, six or nine-month scholarships primary with Latin American countries.

Students leave the United States in supervised groups at the closing of school in June and are placed in homes abroad while they attend school. Students going for the summer only return to the United States by Labor Day, in time for the opening of the fall term.

Cost of the program starts at \$390, which may be paid by the school, community, or family.

Schools may send as many students as they feel are qualified.

Understanding Fostered

The purpose of International Fellowship is to achieve better international relationships through extension of knowledge and mutual understanding among all the peoples of the world and to enlighten public opinion regarding the problems of international conflicts.

International Fellowship was founded in 1952 by a small group of people interested in broadening their knowledge about people and their problems. Since then the organization has grown and expanded.

Presently there are branches in the United States, Hawaii, India, Panama, Ecuador, Chile, Argentina, Colombia, Uruguay, Peru, Brazil, Paraguay, Costa Rica, and Nicaragua.

'Magic Carpet Ride' Theme of Fashion Show

'Magic Carpet Ride to Fashion' will be the theme of the Charioteers' Fashion Show, to be presented on Friday, March 5, at 7:30 p.m. at the Christ Methodist Church.

Clothes from bathing suits to formal attire will be modelled by girls who are as yet unchosen. Laurie's, which is co-sponsoring the Fashion Show, will supply all the clothes to be shown.

Professional groups will supply make-up and earrings for the models, suitable to be worn with each outfit, thus adding a polished touch to the show.

Lasting approximately one hour, this showing is the Charioteers' annual money-making project. Proceeds, from the admission price of \$.50 charged for each person attending, will go to charity.

Karen Zeigenfuss, chairman of the fashion show, stated, "This year's show promises to be a major production." The Holiday Magic Company will provide the make-up, with another company contributing the earrings. Special lighting effects, a backdrop to set the mood of the fashion show, and background music will add atmosphere to the central theme.

Tom Boone is scheduled to be the Master of Ceremonies for the fashion show, with Rig Dees as a special commentator. Audrey Lavine will be present to provide the entertainment at the intermission.

Tickets may be bought from members of the club now or purchased at the door. During the intermission in the show, door prizes will be awarded.

GHS's I Q Bowl Team Members Secure Place In Final Rounds

In The Hi I Q Bowl competition occurring Saturday, February 17, at the University of North Carolina at Greensboro's Elliott Hall, Grimsley's team won three of their four rounds and maintained a place in the competition which concluded Saturday, February 24.

Beginning at 9:15 a.m. and lasting until 3 p.m., the four round, double elimination contest matched 26 participating schools against each other, narrowing the field to 10. These 10 included Grimsley, Page, Smith, Reidsville, R. J. Reynolds, Walter Williams, West Davidson, Ragsdale, Bishop McGuinness, and Curry.

GHS Competes

GHS's team members, David Labell, Carolyn Lyday, Mike Schott, Mike Spital, and Martha Wilmering, were coached by Miss Jennie Lou Divine and Mr. David Stanfield. They had meetings three afternoons a week to practice quick and total recall for the competition.

Sponsors of the Hi I Q Bowl

are the Greensboro Jaycees, WFMY-TV, and North Carolina National Bank. The contest is emceed and directed by the Greensboro Youth Council (GYC).

Each member of the winning team received a \$250 scholarship from NCNB. Scholarships of \$150 were awarded to members of the second place team. Alternates on each team receive lesser amounts. The revolving Hi I Q Bowl trophy was given to the school for one year.

Idea Originated

The idea for a Hi I Q Bowl competition was first designed by the 1965 television committee of the GYC (then YCCA). Their aim was to exhibit the varied accomplishments of the area youth. They felt that achievement and scholarship of the high schools' students were being overlooked by the general public. Through the Hi I Q Bowl, teams of four members and an alternate from high schools in the WFMY viewing area take part in the double elimination rounds of 20 minutes

each.

Objective questions are asked with point value attached. Much as in the College Bowl, toss up questions, worth 10 points are asked. Correct answers for a team carry the privilege of the bonus question, worth from 5 to 15 points. The ninth and if necessary the tenth round is taped for broadcast by WFMY.

All questions are formulated specially for the Bowl competition by UNC-G, Science Research Associates, Greensboro College, Bennett College, A and T and Guilford College.

Adult manpower for the Hi I Q Bowl competition was supplied by the Jaycees.

Curry School won the Hi I Q Bowl competition in its first year. Lexington won in 1966, and Page was last year's winner.

Members of GHS's team for the competition last year were Jim Blackwood, Carol Crocker, Bob Freedman, and Austin Lybrand. Mr. Robert Frederickson was their coach.
