It actually takes 12 months to have a healthy baby.

What a woman does three months before she gets pregnant can make a difference to the health of her baby.

So if you're thinking of getting pregnant soon, stop smoking, drinking or taking drugs. And remember to take a daily multivitamin. Your future baby is depending on you.

A complete work of art...this book of poetry forces us to dive into our feelings about everyday life.

~Tanya R. Wiley

As a retired military agent, it is very rare that I find poetry I can truly relate to. This author has managed to put me in touch with emotions I never knew I had.

~P. Edmonds

It's been a long time coming, but I can finally see a brother making a statement - and it's coming forth loudly and clearly.

~A. Jones-Braun
