

Oscar Satterfield of the Final Examining Department, his wife, Emily, and their six year old son, Lawrence Lee, have recently moved into one of the newly constructed F.H.A. houses, located at 924 West Haven Boulevard. The lot measures 75 x 175 feet. The house has six rooms: two bedrooms, a bath, a living room, a dinette and a kitchen. Oscar's yard was planted in evergreen grass immediately after he moved into his house, and now he has a beautiful green lawn. He hasn't been quite as successful with his shrubs and flowers. He is planting new rose bushes and box woods in a few days to try again.

Vick On Air Cruise

Lester Vick, member of the Caromount weaveshed, entered the Naval Air Reserve in 1942, and served thirty-eight months on active duty until he was discharged in February, 1946.

In April, 1946, Vick joined the Naval Air Reserve Training Unit as an Aviation Machinist Mate on inactive duty.

Lester was called to the Naval Air Station at Norfolk, Virginia, May 13, 1947, to go on a two weeks Naval Air Cruise.

Several of these hops were one-day rides from the Norfolk Naval Air Station to Willow Grove, Penn., and return; from Norfolk to Washington, D. C. and return; and the last hop of the cruise was to New Orleans for a three-day stay and return.

Helpful Hints At Home

Do you have any broken or rickety furniture at home? (Who doesn't? Here's something to occupy your time when the ball club is out of town. It doesn't take a mental giant to tell you that chair rungs not only come loose, but fall right out if the mood strikes them. This generally happens when company is around, so listen carefully.

Usually when you try to glue them back you find that the rung has shrunk so much that the glue won't hold. What you do is to expand the diameter of the wayward rung. The best way of doing this is to make a split at the end of the rung about two inches deep, using a very fine saw. Drive a thin wedge into the split and you'll have a nice tight fit.

If this sounds like a good way to ruin the rung try applying a thin coat of glue to the end of the rung and wrapping heavy thread around it. Let it dry, add one more coat of glue, and force it into the hole.

For the uneager there are little metal sleeves with barbs that fit on the end of the rung, but these sometimes try the patience and take some urging.

Remember to put a piece of wood between your hammer and the finish before you start forcing anything, and don't forget to keep pressure on that furniture glue until it is thoroughly dry.

Note: These suggestions do not necessarily mean that the columnist has no loose furniture.

and caught 21 bull frogs.

Mrs. Mavis Hill Godwin and a party of friends had a full vacation week. The first part was spent fishing at Pamlico, with lots of luck, they say. During the remainder of the week they stayed at Virginia Beach trying to get a sun tan.

Fred Simmons was terribly disappointed when his plans for a restful vacation were torn up because he had company who came to spend their holiday with him.

Estelle Winstead spent her vacation catching all the catfish in Tar River.
