Randolph Sutton Tells Scout About Weaving

Ronnie Hay Tells Club Of Caromount Tour

During recent Boy Scout Week, Ronnie Hay from Caromount's Troop 113, toured our plant and the above picture was taken during his visit with us. During the same week, Ronnie was asked to speak briefly to the local Kiwanis Club, describing his impression of Caromount. The speech he made to the Kiwanians is reprinted here:

"Caromount Mills is a very important mill in Rocky Mount. As well as being a big industry, the mill provides work for over 800 people.

⁸⁰⁰ people. "Caromount has a chemical and a color laboratory. Each play an important part in the mill operations. In the color lab, cloth dyes are tested to be sure of the finest dye for the cloth. Some of the fabrics and doth that Caromount makes are ^{automobile} and furniture upholstery, cloth for coats, artificial lurs, rugs, carpets, and velvets. The mill doesn't make it's own yarn but they buy it and make the finished product. Some of the steps that it takes for cloth are that it first must be woven, then dyed, and then dried. When It is dried and cut it is ready to be sold. "The shops at Caromount are very well kept up and they have the best tools for fixing machines and any other thing that needs fixing. They also employ expert machinists. Last but not least is the canteen, the organization which sponsors the scout troop d. 113. This is a non-profit organi-^{cation} where food is served for the employees. The next time you Pass Caromount think of all these facts that make Caromount one of the best mills in North Caro-

Hints For Filing 1954 Income Tax Returns

Last August you heard such terms as "baby sitter deduction", "Dividend exclusion" and "retirement income credit", when Congress passed the Internal Revenue Code of 1954.

Now these terms will have real meaning as you file your income tax return under the new tax law, containing thousands of changes in its 929 pages.

Some taxpayers may find April 15th—the new deadline for most individuals—a worse shock than March 15th used to be. Most of us, fortunately will find the new tax a little easier. For one thing, a reduction of about 10% in rates took effect in January, 1954, and has been reflected in the amount of tax withheld from pay since then.

But the difference is not just in the rates. The new tax law passed after the rates were reduced—includes many special adjustments aimed at helping people who particularly need relief. You'll get some of these benefits almost automatically as you fill in the blank. Others must be dug out of the fine print. That's why it is particularly important this year not to wait until the last minute, but begin studying your tax returns early.
