Cat Saved Young Foxes. Three young foxes, valued at sev-eral hundreds of dollars, which were slowly starving to death on a farm at Mile Post 80, on the Port Arthur & Duluth railway, have been nearly care of a common house cat. It was selected from several offered by local people in response to a newspaper advertisement. The foxes' mother, her-self worth about \$300, was killed in

Unless you happen to be Opportunity yourself, don't knock.

It's easy to get all the credit you want when you don't want it.

The first application of Resinol Ointment usually takes the itch and burn right out of eczema and similar skin affections. This gentle, healing ointment seems to get right at the root of the trouble, and is almost sure to re-store skin health in a short time

**Pesky Bed-Bugs** P. D. Q.

Bugs, Roaches, Fleas and Ants. Every family should use P. D. Q. house cleaning time to guard against the Pesky Devils and to prevent moths. P. D. Q. is not an insect powder, but is a new chemical that kills lisects and their eggs. Each package contains, free, a patent spout, to enable you to get to the hard-to-get-at places and saves the juice.

A 25 cent package makes, one quart, enough to kill a million insects and their eggs. Your druggist has it or can get it for you. Mailed prepaid upon receipt of price by the Owl Chemical Works, Terre Haute, Ind.

Simply get an ounce of Othine from any druggist and apply a little of it night and morning and you should soon see that even the worst freekies have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more that an ounce is needed to completely clear the skis and gain a beautiful, clear complexion. Be sure to ask for the double-strength Othine, as this is sold under guarantee of measy back if it fails to remove freckles.

Cuticura Soap The Velvet Touch For the Skin long Sie, Outmost 25 and 50c, Talcan 25

By JOHN DICKINSON SHERMAN

HE national parks lost a good friend when Warren G. Harding died. His appreciation and ap-proval of the national park moveproval of the national park move-ment were signally shown at the 1923 opening of Yellowstone for its fifty-first year by an official declaration of administration pol-ley worthy of its place as the first national park in all history and largest and most famous of all America's nineteen public play-part by compress for the use of the

grounds set apart by congress for the use of the people forever. That official declaration of administration policy was nothing less than absolute protection of the national park system against commercial invasion and exploitation.

Pr. John Wesley Hill, chancellor of Lincoln
Memorial university, made the declaration. He
officially represented President Harding and Secretary of the Interior Work at the Yellowstone opening. His statement was prepared, careful and emphatic. It contained the following:

and emphatic. It contained the following:

"And we are here today . . . to celebrate the annual opening of Yellowstone park, the largest and most far-famed of our national parks, a wooded wilderness of farce thousand three hundred square miles, containing incomparable waterfails, more geysers than are found in the rest of the world all put together integrated by recognitions. put together, irrigated by rivers like miniature likes, and beartified by likes like inland sens, curved by canyons of sublimity, decorated with colors defying the painter's art, punctured with innumerable boiling springs whose steam mingles with fleecy clouds, stuccoed with vast areas of petrified forests, a sanctuary of safe retreat for feathered songsters and wild beasts, a wonder-land, playground, sanitarium and university all in one, where the eye feasts upon the riotous colors of flowers, ferns and rocks; the ear is surged with the symphony of melodious sounds; the mind is sated with a thousand revelations of truth and beauty, and the faded body, weary with the trudge of thought and toll and travel, ungirds for song and dance beneath the shadows of the everlasting hills.

where the friends of the park and the park idea have had to fight with a herolam worthy its explorers and discoverers to retain it intact against the bold and presumptuous claims of the advo-cates of special privilege, determined to commercialize this land of wonder, to build raliroads through it, tunnel its mountains, dam its lakes and streams, and secure stranglehold monopolies with small compensation to the government and total loss to the people.

"And regardless of all facts and figures, appeals and threats, therefore, any plan, however meritorious on its face, for the commercial exploitation of parks must by the very nature of its aims and purposes be immediately doomed to

"Good projects, bad projects, indifferent projects, all must face the same fate, for it is at last established policy of the government that our national parks must and shall forever be main tained in absolute, unimpaired form, not only for the present, but for all time to come, a policy has the unqualified support of President

"This is the fixed policy of the administration, and I can assure you it will not be modified. It will not be swerved a hair's breadth by any influ-

ence, financial, political or otherwise.
"If rights are granted to one claimant, others must follow, so a precedent must not be established. It would inevitably ruin the entire national

Doctor Hill might have been more definite in the matter of the attacks by commercial interests upon Yellowstone. Since early in 1920 it has required increasing vigilance and aggressive or-ganized effort on the part of the vast army of national park enthusiasts to defeat these attacks. During the winter and spring of 1920 the Sixtysixth congress nearly passed the Smith bill creating a commercial irrigation reservoir in the southwest corner of Yellowstone for the benefit of granting to a commission power to lease public waters, including those of the national parks and monuments, for water power.

at Will for Benefit of
Resorters.

It appears that "all kinds of waves"

It is reported, can be manufactured to see the second waves.

bill was killed in the house, after it had passed the senate. The Jones-Esch bill exempting national parks, present and future, from the juris-diction of the water power commission was intro-duced and forced forward. The water power interests were powerful enough, however, to force a compromise amendment which exempted only

JACKSON LAKE AND TETONS

national organization of defense,

4,000,000 strong, was quickly effected. The Smith

a compromise amendment which exempted only the existing national parks. The Jones-Esch bill was passed by the Sixty-sixth congress.

In December of 1929 Senator Walsh of Montana championed a bill to dam Yellowstone lake for an irrigation scheme in Montana. A long and hard-fought battle followed. In June of 1921 Sec-retary of the Interior Fall reported on the bill and straddled on the question of protection, holding that power and irrigation development in the national parks should be only "on specific authorization of congress, the works to be constructed and controlled by the federal government." Thereupon Senator Walsh proposed a new bill providing that the United States reclamation service should build and operate the Yellowstone lake dam. The defenders of the park proved that the dam could built to greater advantage outside the park. In 1922 the upholders of the parks won a victory by electing Scott Leavitt in Montana to congress over Jerome Locke, originator of the dam project. The final result of the fight was that the Sixtyseventh congress adjourned March 4, 1923, leaving the Walsh dam in the committee's pigeonholes. Efforts to revive it are expected in the Sixty-

During these three years another victory of great importance along the same line was the smothering in committee of the All-Year National park bill, personally drafted and sponsored by Secretary Fall. This bill created a national park in the Mescalero Indian reservation in New Mexico out of several insignificant spots widely sep-arated, plus an irrigation and power reservoir ninety miles away. It would have introduced both water power and irrigation into the national park There was a nation-wide protest against this bill, in which New Mexico itself took an active part. The bill is too dead, it is believed,

A third victory called nation-wide attention to another danger that threatened—and still threat-ens—the national parks. The victory, was the de-feat of the Siemp bill creating the Appalachian National park out of a Virginia mountain top. It was opposed on the ground that the area was below the proper national park quality. It was favored by Secretary Fall, who in his report to the public lands committee said that his policy was to substitute a wide-open recreational park system of many small playgrounds for our his toric national park system.

The late Franklin K. Lane, as secretary of the

national park platform;

President Harding was the first president to ar nounce publicly a general administration policy of absolute conservation for the national parks and Taft were good friends of the national parks. but preservation against commercial invasion was not a question in their days. President Wilson, in his first term, signed the Hetch Hetchy bill giving San Francisco the water supply reservoir in Yosemite which has just been completed; its secret water power purpose was not then gen-erally understood. President Wilson, however, stood by the national parks loyally and powerfully in the fight to exempt them from the jurisdiction

BILLOWS MAY BE MADE TO ORDER

Any Kind Desired Are Now Produced at Will for Benefit of Resorters.

The specific of Resorters is the short, choppy kind; the whitecap variety and big ones resembling the ocean waves. Each of these manufactured is represented to the plunger have been dead once and cause the big swells. If the short, choppy wave is wanted the plungers are worked independently of each other. Two up and two down gives the whitecap sort.

This curious machinery, which the electric motor that drives the machinery waves were invented to other.

It is reported, can be manufactured at will merely by manipulating the four plungers of the machine in difference and order any one of a half dozen warieties of waves, produced by an odd-looking bit of machinery devised for the purpose.

Some of the six or seven varieties to cause the four plungers to work in samples and make bathers think they are enjoying a real Atlantic or Pacific surfulling billows all you have to do is to cause the four plungers to work in working, for as soon as the electric makes perfect waves, was invented to convert placid lakes at summer resorts into lakes with real live waves and make bathers think they are enjoying a real Atlantic or Pacific surfulling billows all you have to do is to cause the four plungers to work in

There is confusion in the minds of many persons as to the difference between coco, coca, cancao and cocon. The original spelling of the breakfast beverage, "cacao," has been preserved in German, Spanish and French, but England and America spell it "cocoa." It is the theobroma cacao that yields this chocolate drink. The tree is pantive of South America, but has been planted in all parts of the tropics.

Famous London Spot is Threatened Without the god of love would never be the same, it is argued. This statue is one of the finest in London. It frequently attracts the attention of night revelers and bands of "ragging" students, who often place a grotesque hat on the head of Eros, the god of love, surmounting to annoy the policemen. For more than a week after the armistic celebration of the tropics.

makes perfect waves, was invented to convert placid lakes at summer re-

PARTED TERRACE Mynesthoto -

President Harding, in announcing this adminmand so much as answering it. The truth is that the American people have within the last three years adopted our nineteen national parks as a part of their conception of the greatness of their nation. "Hands off!" applies to the national parks as well as to Old Glory. They are eager to defend them and to I ep them inviolate. And they have developed or, nized strength through the affiliation of a dozen or so nation-wide organ-izations to see that congress shall legislate wisely concerning the national parks. The announcement of the conservation policy was received with nation-wide delight. The national park enthusiasts hoped that the conservation policy would be broadened to uphold Secretary Lane's important

Yellowstone also gets into the limelight this son because President Harding paid it a two-s' visit on his way to Alaska. The President's days' visit on his way to Alaska. party went in and out through the north entrance and did about 150 miles of motoring in seeing various points of interest. On the Continental Divide they drove through snowbanks. The Pres ident went yachting on Yellowstone lake-undammed. He saw many wild animals and fed gingerbread and molasses to a black bear and her He saw the Painted Terraces of Mammoth Hot Springs. Old Faithful geyser spouted 150 feet into the air every sixty-five minutes for him—as it does for every visitor. The photograph reproduced herewith shows the President and Mrs. Harding, under escort of Superintendent Horace M. Albright, viewing from Artist Point the Grand Canyon of the Yellowstone and the Lower Falls. The President was visibly impressed by the sight—one of the grandest and most beautiful in the world.

Just sixty-three years-1807-1870-were required to put Yellowstone on the map; the American people simply wouldn't believe there was any such place. The Lewis and Clark expedition of 1804-06 passed close by it, but the Indians never mentioned it, considering it the abode of "Evil mentioned it, considering it the about them. John Spirits," who punished all talk about them. John Colter, a member of the party who went back to trap beaver, discovered it in 1807. Upon his return to St. Louis in 1810 the people dubbed it "Colter's Hell" and laughed him and his tale out of court. James Bridger rediscovered it about 1828 and the public said "Just another of Jim Bridger's big yarns." The gold prospectors of 1862 described it and were set down as liars. It took the Washburn-Langford expedition of 1870 to took the Washburn-Langford expedition of 1870 to make the people believe in its wonders. The mem-bers of that expedition were for pre-empting the scenic points and making their fortunes. Cor-nelius Hedges rebuked them and proposed the national park plan—the first in all history. The park was established by act of congress in 1872 and Yellowstone celebrated its semi-centennial last fall.

Vellowstone contains 3,348 square miles—3,114 in Wyoming, 198 in Montana and 36 in Idaho. Big as it is, the plan is to enlarge it by the addition of many square miles to the south—the Jackson Hole country, which contains Jackson lake and the Teton mountains and is a natural part of

surmounting it does interfere with the huge traffic which makes this point

perhaps the most congested in London, it is a landmark. Besides it lends

CAN'T FOOL HIM

Johnny paid his first visit to a farm the other day. All his life he had lived in the heart of a great city, and when he suddenly came in sight of a haystack, he stopped and gazed earnestly at what appeared to him as a new brand of architecture.
"Say, Mr. Smith," he remarked to

the farmer, pointing to the haystack, "why don't they have doors and win-

dows in it?"
"Doors and windows!" smiled the farmer, "That's not a house, Johnny, that's hay."

"Don't try to kid me, Mr. Smith!" was the scornful rejoinder, "Don't you suppose I know that hay don't grow in humps like that?"—Miami Herald.
