

YOUNG WOMEN MAY KEEP WELL

By Lydia E. Pinkham's Vegetable Compound Here is Proof

St. Paul, Minn.—"Here is a little advice I would like to have you put in the papers." Mrs. Jack Lorberter of 704 Dellowood Place wrote to the Lydia E. Pinkham Medicine Company. "If young women want to keep their health and strength for the next thirty years of their lives, it is best to start in right now and take Lydia E. Pinkham's Vegetable Compound. I have tried the compound myself and received fine results from its use." In describing her condition before taking the Compound, she writes, "I was afraid in my own house in broad daylight, I used to lock the doors and pull down the shades so that nobody could see me." One day a booklet advertising the Compound was left on her porch and she read it through. In so doing, she found a letter from a woman whose condition was similar to her own. "I bought Lydia E. Pinkham's Vegetable Compound," Mrs. Lorberter continued, "and have had fine results. My condition made me a burden to my husband. Now I am happy. 'Tis a blessing from heaven' and he says, 'It is just like being in heaven.' Are you on the Sunlit Road to Better Health?"

CUTS and SCRATCHES Resinol

Stop the smarting and hasten the healing by prompt application of Resinol
Last Call
Leslie Eddy, eight-year-old son of Mr. and Mrs. Harry Eddy, who live west of the city at the turn of the Tenth street road, was out in the fields Sunday evening with a crowd of other youngsters flying kites. At about seven o'clock the boy sighed, "What's the matter, Leslie?" the father of one of his playmates asked. "I guess I don't get any supper tonight," he complained. "Why not?" "Well, I just heard the folks call the dog and he always eats last."—Tospeka Journal.

Test Your Brain
The "ask me another" fad is the first definite success of the crossword puzzle. Conversations overheard in public conveyances indicate that many of the "ask me's" are as intriguing as the puzzles over which enthusiasts worried far into the night. "It's always a challenge to try one more, and if you want to find out just how little you know, have some one start asking!"—a fan said.

Only One Result
"Do you talk over things with your feet?" "No, I'd get talked over, first."—Boston Transcript.

Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take, Elixir Must Help Poor Distressed Stomachs or Money Gladly Refunded.
You can be so distressed with gas and fullness from poor digestion or dyspepsia that you think your heart is going to stop beating. Your stomach may be so distended that your breathing is short and gaspy. You are dizzy and pray for quick relief—what's to be done?
Just one tablespoonful of Dare's Mentha Pepsin and speedily the gas disappears, the pressing on the heart ceases and you can breathe deep and naturally.
Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all?
Especially when any druggist anywhere guarantees Dare's Mentha Pepsin, a pleasant elixir, to help you or money back.

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

GOLD MEDAL HAARLEM OIL CAPSULES

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.
Mitchell Eye Salve For SORE EYES

FREE MAP OF WEEPAH
The new Gold Camp where ore assays bring \$100.00 per ton in gold was discovered and started the greatest mining stampede since the days of '49. You believe it will give another Gold field where fortunes were quickly made from actual mining during the period of mine development.

FAMOUS MINING STRIKES

By THOMAS E. STEWARD

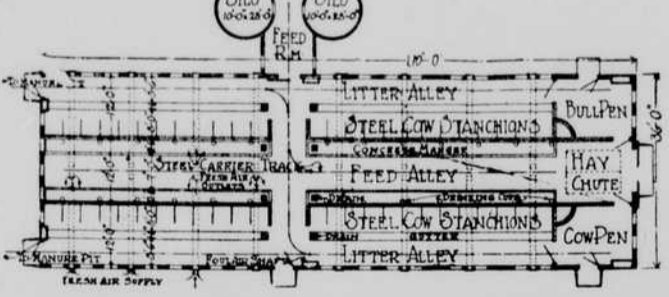

Search for New Mining Methods
THE government's study of the Mesabi iron district ends with 1902 and gives the shipments in that year as 13,323,953 tons of ore. Scarcely the author considered this a tremendous figure, perhaps one that would not easily be surpassed. Yet in the years of the World War Minnesota shipped as high as 45,000,000 tons of ore in one year, and duplicated that record in 1923. The iron ranges of the entire Lake Superior district, including Wisconsin and Michigan, have shipped an aggregate of 67,000,000 tons in a single year.

This is the increase of a mining industry that began in 1802 with the modest shipment of 4,245 tons from the Mesabi range, jumped to 4,275,000 tons in 1907, to 7,800,000 tons in 1900 and as has been pointed out, to 13,323,953 in 1902, 10 years after its opening.
Notwithstanding the immense amounts of ore that have been taken from the iron mines of Minnesota hundreds of millions of tons of high grade ore remain.
Estimates look forward to the exhaustion of the high-grade ore supply in something like 30 years.
Meanwhile the mines experiment station at the University of Minnesota is bending all of its energies to the task of finding methods for "beneficiating" low-grade ores so that they may profitably be shipped. One method has been developed that makes it perfectly possible to use the rocklike "magnetite" ores of the eastern range but the method is expensive and can be used only in years when the price of ore is so high that these mines can be operated at a profit. The state of Minnesota is now appropriating something like \$200,000 a year for use in experiments looking to the separation of iron from low-grade ores by a roasting or "metallizing" process that could be carried on near the spot where the ore was mined. This will be important if it is developed because most of the smelters using this ore are far away, at Chicago, Gary, Cleveland, Toledo, or elsewhere. Cost of transporting the ore is great. The rich ores, some of them containing from 60 to 65 per cent in actual iron can always be shipped, but from 45 per cent iron on down to 25 per cent iron, the ores are so lean that the shipper is paying an inordinate amount of freight on mere waste material that must be thrown away at the other end.
If the Minnesota School of Mines experiment station succeeds in accomplishing the method of "metallizing" it will add millions of dollars to the wealth that state will derive from taxes and will indefinitely prolong Minnesota's mining industry. Efforts made to place the supply of low-grade ores on the iron range at many billions of tons.

Spanish Strike in Arizona
THE region now known as the State of Arizona was a remote moon-land area in the northern section of Spain's American possessions back in the eighteenth century. As early as 1690 Spain had sent expeditions into the districts now known as California, New Mexico and Arizona, and some gold and silver had been found. In 1788 a remarkable deposit of silver nuggets was discovered in Arizona, but it was exhausted in three years.
The celebrated and rich silver strike in the Santa Rita mountains of Arizona, made in the year 1763, has been described in an old Spanish work on "Apostolic Labours of the Society of Jesus." It says:
"In the year 1769 a region of virgin silver was discovered on the frontier of the Apaches, a tribe exceedingly warlike and brave, at the place called Arizona.
"News of such surprising wealth attracted a vast multitude to the spot. At a depth of a few yards masses of fine silver of a globular form and 25 to 50 pounds in weight were found and one lump, discovered by a government official, weighed 3,500 pounds. Many persons amassed huge fortunes while others, equally diligent in the search, found nothing."
Under the pretense that he was acting for the safety of the treasure that had been discovered, the captain general of the district sent troops which escorted the silver train bearing the wealth to his own headquarters. When he had his hands on it he seized it in the name of the crown, claiming that it had been found on crown property. The discoverers had little liking for this procedure and appealed to the Mexican authorities at Guadalajara, but they were unwilling to take action and referred the whole matter to the royal court at Madrid. Seven years dragged by before an order came from the Spanish crown, and even then it dashed the hopes of the miners. The crown claimed the entire property and whatever it had produced.
This discouraging situation, together with repeated attacks by hostile Indians, finally put an end to mining in the Santa Rita mountains and no further important mining was done in Arizona until about 1879. Then came the silver strike at the town of Tombstone, so named, it is said, because of the frequent demand that arose for something to decorate a grave.

To Clean Aluminum
Save the energy you would ordinarily use in cleaning darkened aluminum—save yourself the expense, too, small as it is, of an aluminum polish. For the simplest way to take off dark stains on aluminum is to cook appleauce or tomatoe in the dish. The acid of the food will brighten the aluminum and it has absolutely no effect which is in any way harmful upon the food, nor does it in any way change the nutritive value of the food.—Chicago Journal.

Gambrel-Roofed Barn Is Equipped Fully for Profitable Operation

By WILLIAM A. RADFORD
Mr. William A. Radford will answer FREE OF COST on all problems pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie Avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

The equipment enumerated is essential in these days of high labor costs, for it makes the numerous details of properly caring for a dairy herd easier, and cuts the cost of the labor required to perform the work.
The exterior view of the building shows the continuous rows of windows that admit sunshine and warmth to the stable floor. The stalls are ranged on two sides of a central feeding alley, with the cows facing the center of the building. The gutters are in the rear and are in range of the sunshine admitted by the windows, an arrangement that helps keep the building sanitary.
Above the stable is the mow floor, where there is plenty of room to store the roughage this number of animals will need during the time they are housed. Adjoining are twin silos for the fresh feed that is supplied the cows during the winter.

Cheap Plaster Costly Experiment in the Home

So-called cheap construction is usually expensive construction, in that it causes constant care and expense when deterioration begins. Reasonable construction can be obtained only by paying a reasonable price.
There is no single place where good or bad work shows up as it does in plastering. If plastering is neglected or skimped, either through ignorance or design, the result is cracks, or rough waves or ridges if papered, or even the danger of falling of the plaster. There are several causes due to lack of knowledge or carelessness of the mortar man or the plasterer that contribute to plaster failures. It is essential with any material that the mortar be well mixed, and the backing of wood lath, block, brick or concrete be dampened before it is covered. With metal lath this is not necessary but it is well to bear in mind that the lath must be tight.
Plaster hazards are minimized by the use of lime. It produces a plaster that sets slowly enough to adjust itself. It hardens by drying out and is not dependent upon crystallization, and is free from the necessity of having just the proper amount of water in the mortar. A further factor of interest to the builder, and owner, too, is a saving of as much as 8 per cent of the cost of the plaster in that the droppings of lime plaster may be re-tempered and used again with perfect safety.
Lime plaster gives a smooth, hard surface and the hardening process being gradual the plasterer has time to trim up his work and avoid waves and uneven places on the walls and ceilings.
On construction jobs such as the smaller type of house, an architect is seldom employed. The design is sometimes made by the owner who knows little or nothing about building, and given to a builder with the iron-clad instruction that the cost must be kept to a minimum, or else the contractors must bid for the work under conditions that most always necessitate the cutting of costs to the detriment of the job.
It is often difficult to impress those outside the building trades with the necessity of using only the best plaster materials, and the highest grade

Satisfaction Found in Ample Electric Outlets

As a home owner you will get satisfaction only as you are able to make convenient use of electrical appliances—only as you can change the arrangement of the lamps as often as you desire—only as you make electricity a servant who follows you from room to room, ready at every point to save you labor and afford you a hundred comforts.
Lime Plaster Affords Variety in Finishes
Lime plaster is used to produce many finishes, because lime has certain qualities not found in any other material. It works smoothly and easily on the plasterer's trowel. This fact is well illustrated by the common saying of plasterers that lime "spreads like warm butter." This plasterity helps them to do more and better work.
Lime plaster also hardens slowly enough to allow the plasterer to produce exactly the surface desired. This is particularly important in the case of the texture finishes, in rendering which the plasterer uses a variety of instruments to work out the surface patterns characteristic of the period being reproduced.
Another trend in home building is the growing popularity of "all-plaster" interiors. In these not only the walls and ceilings are lime-plastered, but also cornices, beams, pilasters, moldings and arches. These receive a variety of decorative treatment, vying with the masterpieces of the old-time craftsman, whose work was too long forgotten.
Cover Old Shingles
Now you can build a better roof right over the old wood shingles. You not only save the expense and bother of tearing them off, but you get a roof that's fire-safe, unusually weather tight, long-lived and trouble-free and one that adds many dollars worth of beauty to your home as well. Several manufacturers are now making shingles of great beauty which may be applied over your old roof.

Form Lumber Should Be Surfaced on Side

All form lumber, regardless of where it is to be used, should be surfaced on one side and one edge. In so doing the lumber will work much easier and will also provide a much more satisfactory appearance. Lumber which is surfaced will make a much tighter form and will hold all the cement and sand, avoiding the possibilities of rock pockets and rough surfaces in the concrete. Ship lap or tongue and grooved lumber is most satisfactory.

LIFE IN FORT MINK

After Mrs. Toofus had kissed her husband effusively, she promptly asked for five dollars, which he as promptly refused.
"Fig! I wish those affections upon you, I kiss you, and yet you refuse me those five dollars!"
"Here are those five dollars," responded the Fort Mink philosopher and guide. "Now I can't afford any more kisses just at present."

THEN THE IRON FLEW

Wife—Here I've been pressing clothes all day! I'm weary of ironing!
Hubby—Sort of ironing bored I suppose?

New Plays a Harp
At sixty minutes
Drove Tommie Sharp;
There came a train—
He plays a harp.

Undertook Mr. Jones
Jim and Andy were discussing the death of a friend.
Jim said—Andy, who wine to bury Mr. Jones?
Andy replied—I don't know who wine bury him, but Mr. Smith undertook him.
(Mr. Smith was the undertaker.)—The Outlook.

Another Broken Heart
Motorist—I'm sorry I ran over your hen. Would a dollar make it right?
Farmer—Waal, better make it two. I have a rooster that was mighty fond of that hen, and the shock might kill him, too.

Swimming in It
Parson—Did poverty drive you to your criminal ways?
Prisoner—Not at all. I was simply coining money.—Sydney Bulletin.

Throw That One Out
Bill—Every time I look at you I have thoughts of revenge.
Mac—Oh, why?
Bill—Revenge is sweet, you know.

SCRAPS WITH HIS WIFE
She—Do you have many scraps with your wife?
He—Almost every night at supper—whatever is left over from dinner, you know.

Oh, My Cherries
Robin Redbreast said to me
"May I build a nest in your apple tree?"
"Sure," said I, and I heaved a sigh—
"But stay away from the Cherry Tree."

Tempest Brewing
Mr. Stinger—Jane, I am going to take that car out in the yard and fix it, or bust it.
Mrs. Stinger—Why, John, just think of the neighbors—and you baptized only last Sunday morning.

Paging Mr. Lincoln
"You're fired!" stormed the hard-boiled boss.
"Fired? How you talk!" sneered the stenog. "I supposed they sold slaves."—American Legion Monthly.

Oh!
Rod—I suppose you consider it quite a triumph to make a fool of me?
Jane—Why no. A triumph means something accomplished that was very difficult.

Pointed and Headed
"I can't find a single pin! Where do they all go to, anyway?"
"It's hard to tell, because they're pointed in one direction and they're headed in another."

Strange Complaint
Mrs. Smith (calling on Mrs. Brown, who is not well)—And what did the doctor say was your trouble?
Mrs. Brown—Auto Intoxication.
Mrs. Smith—Indeed! And you don't ride much either.—Woman's World.

No Trick at All
Tailor—If you don't pay me something in advance I'll be like a bridge player with four aces.
Deadbetter—How so?
Tailor—I'll have your suit stopped.

Spanish American War Veteran Wins 15-Year Fight

Baltimore business man conquered illness. Gained 7 lbs. Thanks Tanlac

A chronic invalid for 15 years. A dogged fight to win lost health. Rugged, robust health at last. That is the truly wonderful record of Geo. E. Lehman, 3121 Dillon St., who served with the Maryland troops in the Spanish-American War.
"For 15 years," he said, "I suffered acutely from chronic indigestion. Gas, stomach pains, dizzy spells and general lassitude and weakness made life a dreary drudge. I lost weight gradually and the distressing symptoms grew worse with time. Stiffness in arms and legs and a swell-like pain in the small of my back made the almost yell with pain at times."
"Soon after starting on Tanlac I felt a different man. My appetite came back and I actually enjoyed my food. It agreed with me, too, so that I could eat anything I cared for without fear of dista afterwards. I gained 7 lbs. in a short time. Tanlac

proved a blessing to me." Tanlac is nature's own remedy, made from roots, bark and herbs. Your druggist has it. Get a trial bottle today. Over 52,000,000 bottles already sold.

Improved Flashlight

Engineers in the United States army are experimenting with a batteryless flashlight which contains its own generator. The motive power that causes the generator is supplied by a spring that winds up like a clock. A single winding will furnish a continuous light for three minutes.

Wanted: High school and college students and teachers to address envelopes, fold and mail circulars. Profitable, permanent employment to those who take on this work. Information where and how to get it 25c. Campbell, Charleston, W. Va. Box 1797—Adv.

Canned Deer

A fallow in Alaska, it is stated, is contemplating the erection of a deer cannery for the preservation of reindeer meat. Food experts claim that the meat tastes like veal and retains the original flavor because it is cooked in the can.

Sheep and Goats

The Man (real artist)—Were they all artistic people you met there?
The Girl—Some of them were, but some were quite nice.

Cuticura Heals Irritating Rashes

Don't suffer with rashes, eczemas or irritations when Cuticura Soap and Ointment will quickly relieve and heal. Bathe with Cuticura Soap and hot water, dry and anoint with Cuticura Ointment. Nothing quicker or safer than Cuticura Soap and Ointment for all skin troubles.
Soap 25c. Ointment 25c. and 50c. Telegrams: Sold everywhere. Sample each free. Address: "Cuticura Laboratories, Dept. 21, Malden, Mass."
Cuticura Shaving Stick 25c.

Green's August Flower

For Indigestion, Dyspepsia, etc. Relieves Distress after Hurrised Meals or Overeating. Being a gentle laxative, it keeps the digestive tract working normally. 30c & 90c. At all Druggists. G. C. GREEN, Inc. WOODBURY, N. J.

Intriguing Straws on Spring Fashion Card

Feminine is the watchword of Paris in the new spring fads of intriguing straw allied with felt, grosgrain and satin, says Fashionable Dress Magazine, explaining that soft creasing and color help to create this charming effect.
"Color is perhaps the dominating note of the season. A smart new note stresses the ensemble idea, with the hat matching the frock, rather than the coat. Blues are extremely important and rose-beige tones are good. Black and black-and-white, as well as all white, are much stressed."
Hats are worn pulled down well over the eyes according to this style authority, and crowns prefer to follow the shape of the head. If the crown fails to show a softening crease or dimple, the brim is likely to tuck itself into an engagingly feminine fold at the side.
The poke appears often among spring style modes, and is one of the most quaint and becoming styles. The tendency to lift the brim at the front encourages another flattering military trait of using brim facings. The magazine predicts wider brims of the cartwheel trim with flower trimming flat on the brim for the summer sun.
"Grosgrain retains its prestige, but satin ribbon is in high favor, and there are many charming flower trimmings, although these are usually of a restrained type," states this article.
Elaborate Trimmings
Modes of greater elaboration are in evidence. Where lines are simple the importance of fabric is emphasized in the rich materials used, and intricate details of heading and embroidery are in keeping with the tendency toward more formal decorations.
New Ribbon-Tied Pumps
The newest shoes for spring tie over the instep with ribbons. They come in the new cherry patent leather, as well as other smart leathers.
