"Twilight Reveries"

There are many sleek, lovely ladies who have had a part in his life, perhaps, but not one of them hold in their graceful, white hands the heartstrings of his love.

"MY SWEETHEART" You look absurdly like a little girl - A little girl whose cherub loveliness - Heavensent, and one pale yellow curl - Peeps from underneath your cap, to caress - A velvet cheek, while eyes of soft gray-blue - Overflow with love shining like a star. You look absurdly like my sweetheart, too, - And darling, that's exactly what you are!

Dorothy Ballenger.

Mrs. R. J. Knight and children of Baltimore, Md., spent Monday with relatives here. Mrs. S. D. Knight returned with them to spend a week.

Flying Cadet Jennings Knight of March Field, Cal. is home on a furlough.

Dutch Seifert, Jr. of Chapel Hill spent the week end at home.

Miss Anne Moore of Richmond spent the week end at home.

Lt. Lt. Selden of Texas, Mr. and Mrs. J. N. Selden of Jackson were Sunday guests of Mr. and Mrs. J. S. Selden. Lt. Selden left Monday to return to his post in Texas.

James Tilghman of Savannah, Ga. spent the week end at home.

Mrs. D. P. Moore has returned from a visit to relatives in South Carolina.

Bill Green of Savannah, Ga., spent the week end at home.

Mr. and Mrs. George Green, Jr. and daughter of Scotland Neck are guests of Mr. and Mrs. George C. Green, Sr.

Mrs. Spencer Woody and son have returned from a weeks stay with her parents in Roxboro.

Mrs. W. A. Carter spent the week end in Roxboro with Mr. and Mrs. Coy Day.

Misses Mabel Alston of Lillingston and Edith Mae Alston of E. C. T. C., Greenville, were called home over the week end on account of the death of their aunt Mrs. Watkins of Emporia.

Miss Ellen Shaw of Scotland Neck spent several days last week with Miss Ernestine Turner.

Mr. and Mrs. Handie Rowe of Portsmouth were week end guests

of Mrs. Annie Rowe. Doral Chenoweth and Bert Ross of E. M. L., Salemburg spent the week end in Scotland Neck.

Miss Lucile Oakes spent the week end in Scotland Neck.

Bob Shepherd of Wake Forest spent the week end at home.

Friends of Mrs. W. S. O. E. Robinson will be glad to learn she has returned from Duke Hospital where she underwent treatment.

J. D. Hartsoe of N. C. State College spent the week end with his parents.

Lt. David Ward of Norfolk, Va. spent the week end at home.

Mrs. Pattie Harding of Portsmouth, Va., spent several days last week with Mr. and Mrs. C. G. Tilghman.

Mrs. J. T. D. Rawlings attended the funeral of Mr. T. E. Brown in Wilson Sunday.

Birth Announcement

Mr. and Mrs. R. C. Cranford of Raleigh announce the birth of a daughter, Elizabeth Anne on Saturday, April 25th, Rex Hospital. Mrs. Cranford formerly was Miss Elizabeth Bound of Weldon.

CONTROLLING THE FLOODS OF HATRED ...by RUTH TAYLOR

When the snows melt on the far off mountain tops and the spring rains begin to fall, then those who dwell by the great rivers watch for flood waters. What may be life giving streams to great parts of our land are devastating torrents to other sections. Flood control is a vital subject to those who dwell in the lowlands through which the rivers course.

The government engineers have made great strides in averting the damage of flood. They have built great walls to wall off the rivers; they have reforested great tracts of land to absorb the excess water they have built great dams to hold back the torrents and to control their flow into other areas so they may make fertile great wastelands.

All this is most essential - but even more necessary today is a system of hate control. As the fortunes of war wage and wane, and as grief and loss touch us more and more closely, there is growing in this land of ours increasing hatred and bitterness. Shall we let this flood warp and destroy much of what we hold dear?

We need to build walls of understanding to hold the hatreds out. For mutual understanding leads to mutual trust and in trust there is no hate.

We need to reforest the scarred places in our minds - scars caused by hatred, bitterness, despair and intolerance - to reforest them with understanding, compassion, friendliness and love.

We need to dam back the floods of hate with bulwarks of education - education in positive democratic living, in putting into

practice in our everyday life the things in which we believe.

We need to divert the stream of hate into useful channels, concentrating it on an ideology, not on peoples or races - hating only the evil act or quality. Our hatred must run between such concrete walls of our wills, that we will not be guilty of either injustice or intolerance to any member of any group merely because of his race or creed or color, no more than we would want him to be guilty of these towards us. Thus and only thus can we control the flood waters of hate.

State College Hints Farm Housewives

BY RUTH CURRENT

State Home Demonstration Agent Be sure to get rotenone or some good insecticide to fight bean beetles. Don't let them catch us!

What can you do to help America win the war? Here are some suggestions.

Fatten more pigs; grow more tomatoes; produce more poultry and eggs; grow more yellow soybeans; plant better home gardens; keep some bees; plant some case seed; and improve the soil.

Don't complain about the sugar shortage. Put in a crop of molasses or get yourself a colony of bees.

Don't worry. If you can't do anything about the problem, forget it. If you can, then get busy.

Don't be too critical of everything. Do the best you can, do the most you can, and lend a helping hand wherever you can.

It is very important to select good quality, comfortable shoes because you will be riding less and walking more. Good quality leather that will give good service and lower heels in women's day time shoes, novelties for dress.

Brush and polish your shoes regularly.

Use shoe trees to keep your shoes in shape.

Have heels straightened and soles repaired. Avoid suffing.

Care In Milking Means Full Pails

Along with other things, good milking is a factor not to be overlooked by North Carolina dairymen in attaining their 1942 milk goal, explains John A. Arey, Extension dairy specialist of N. C. State College.

For instance he says, many low herd averages and individual cow records can be attributed to careless, inefficient milking. The dairy cow was a sensitive, nervous system which reacts quickly to adverse conditions such as irregular milking, rough handling, slow incomplete milking and sudden changes of almost any kind.

A practical application of the following rules will result in a substantial increase in the 1942 milk production in this State. Milking at the same hour with very few minutes variation is of vital importance for full and complete production.

The order of milking cows in the barn should be mapped out carefully. Cows that "let their milk down" first should be milked first.

When the milking is begun, it must progress rapidly to completion. Four to not more than seven minutes can be occupied in the milking process. Slow milking results in decreased production. When the milking is completed or if the cow stops secreting, it is time to stop milking. Too much stripping or prolonged manipu-

lation develops "strippers."

The temperament of the milker and the handler of the cows is important. Fear, suspicion, and excitement should not be aroused. Nothing should appear in the barn before or during milking to detract the cow's attention. Rough milking should be avoided.

It is of vital importance that nothing be done that stimulates milk "let down" any considerable time in advance of milking.

STATE COLLEGE ANSWERS TIMELY FARM QUESTIONS

QUESTION--I have heard that rotenone dust will be scarce this year. What information do you have about this?

ANSWER--The War Production Board has issued an order prohibiting the use of rotenone or products containing rotenone (except those already prepared) for treating cotton, tobacco, cranberries, eggplant, onions, peppers, sweet corn, and such crops as cucumbers, melons, squash and pumpkins. The use of rotenone in household insecticides is also prohibited. Imports of rotenone from Malaya and the Netherlands East Indies have been cut off and Latin American sources are not expected to supply this country in sufficient quantities to overcome this loss. Substitutes, such as pyrethrum and nicotine sulphate, are recommended.

QUESTION--Can you tell me of an inexpensive way of destroying honeysuckle?

ANSWER--E. C. Blair, Extension agronomist, says burning the vines off during winter will rid ditchbanks of this plant for a year or two. Although somewhat green, the vines will burn. Commercial weed killers will also destroy honeysuckers, but may prove expensive. If ditch banks were leveled off and cleaned so that they could be mowed, this would tend to keep not only honeysuckle, but other weeds and bushes under control.

QUESTION--How can I control plant lice?

ANSWER--Use nicotine sulphate at the rate of 1 1-2 teaspoonfuls to a gallon of water. A satisfactory home made tobacco spray can be prepared by soaking a pound of tobacco stems or leaves in a gallon of water for 24

Week of May 4th.

MONDAY, TUESDAY Jack Benney - Kay Francis

CHARLEYS AUNT Beginning Monday night May 4th all night shows will start at 8:00 o'clock instead of 7:30. Admission--Children 9c. All adults down stairs 25c. Balcony 20c, including tax.

WEDNESDAY George Montgomery

LAST OF THE DUANS Admission - Afternoon and Night 9c and 20c, including new tax.

THURSDAY and FRIDAY Henry Fonda - Joan Bennett

WILD GEESE CALLING Admission--Children 9c. All adults down stairs 25c. Balcony 20c, including tax.

SATURDAY John Mc Browa

RAWHIDE RANGE

hours. Then shave up a one inch cube of soap and add to the tobacco water. This spray must come into contact with the plant lice to secure good control.

Soda Shortage Turns Farmers To Legumes

Nitrate of soda, vital to North Carolina farmers but even more vital to United States in the manufacture of munitions, may be replaced to some extent by the growing of more winter legumes, says E. C. Blair, Extension agronomist of N. C. State College.

Nitrate of soda is scarce this year and has been placed on the ration list by the War Production Board. Next year, Blair said, farmers may expect to find an even smaller supply of this crop food. At a recent series of winter legume field meetings, the State College agronomist explained to those present that legumes must be allowed to make a heavy growth if they are to be of value to the soil. Such a growth is equivalent to approximately 250 pounds of nitrate of soda an acre.

The nitrogen added to the soil is in direct proportion to the amount of growth turned under. This is contrary to a widespread belief, Blair pointed out, that legumes store up nitrogen in the root-nodules formed by the nitrogen gathering bacteria. It has been shown that these nodules are simply the points at which the nitrogen enters the plant, to be stored in its stalks and leaves.

Before North Carolina farmers can derive a maximum of good from winter legumes, the practice of growing seed in this State and preferably on the home farm must be learned. At the present time, most of such seed come from the Far West.

Blair told farmers at these field meetings that early planting is absolutely necessary for best results.

Caffey Urges Care In Issuing Wine License

Greensboro, April 22--John W. Caffey, Director of the North Carolina Association for Wine Control has today addressed an urgent appeal to the chairman of all boards of county commissioners in

North Carolina requesting them to carefully examine and scrutinize all applications before issuing any wine licenses. Wine licenses are due May 1st.

The Association which is dedicated to the broad program of voluntarily policing the wine industry wherein the existing laws are deficient and inadequate, is calling upon all law enforcement officials to see to it that only those individuals and places of business which measure up to the

highest of standards and character are given a license to sell wine.

Mr. Caffey, employing the language of Louis Pasteur in stating that "Wine is the most healthful and most hygienic of all beverages, but that the Association will not tolerate the sale of same in a manner which is not conducive of high morals, and will not permit the use of a wine license as a blind front for immoral or illegal activities.

PROGRAM WEEK OF MAY 3rd., 1942

Table with 2 columns: SUNDAY, MONDAY-TUESDAY, WEDNESDAY - THURSDAY, FRIDAY, SATURDAY. Shows include BAHAMA PASSAGE, THE SPOILERS, LARCENY, INC., DOWN RIO GRANDE WAY, CADET GIRL, BAHAMA PASSAGE, PACIFIC BLACKOUT, HEART OF THE RIO GRANDE.

Roanoke Rapids Theatres on The Air Monday Through Friday - 3:00 P. M. Radio Station WCBT.

LEVON Theatre

PROGRAM WEEK OF MAY 3rd., 1942

Sunday-Monday Wallace Beery-Marjorie Main in BUGLE SOUNDS NEWS AND ACT

Tuesday - Wednesday Gracie Allen - William Post, Jr. Mr. And Mrs. North COMEDY AND ACT

Thursday-Friday Nelson Eddy - Rise Stevens in Chocolate Soldier COMEDY AND ACT

Saturday Lynne Bari in PERFECT SNOB Buster Grabbe in BILLY THE KID'S ROUNDUP Chapter 8 Holt of The Secret Service

Coming to LEVON THEATRE, Enfield, Sunday and Monday, May 3-4 How Green Was My Valley; Thursday and Friday, May and 8 Corsican Bros.

WAR BOND JINGLE CONTEST advertisement for WCBT. Features Ramona Tune Twisters and The Pepsi-Cola Trio. Includes details about the contest and prize.
